Beware of Raised Notes

We are informed that \$5 U. S. notes, portrait of Jackson, series 1907, raised to \$10, are in circulation in Connecticut and lower New York State.

New Gold Certificates

Secretary of the Treasury Cortelyou has had prepared at the Bureau of Engraving and Printing new designs for gold certificates of the ten and fifty-dollar denominations. On the face of the ten-dollar certificate is a bust portrait of the late President Cleveland, the lower part framed in a wreath of laurel, and on the face of the fifty is a portrait of General Grant similarly treated with a wreath of oak leaves. The text on the face of each of the notes is so arranged as to have the general effect of a wide pedestal upon which the busts are resting. The numerals in the corners of the notes are large and conspicuous and the scroll engraved borders are narrower than in other notes, leaving a larger white space in the centre.

New and Dangerous Counterfeit \$5 Silver Certificate

CHECK LETTER A.

Mr. John E. Wilkie, Chief of the Secret Service, reports a new counterfeit as follows: Act of August 4, 1886; series 1899; check letter "A," face plate number 652; back plate number 493; J. W. Lyons, Register; Ellis H. Roberts, Treasurer; portrait of Indian Chief.

The sample note under examination, which bears the serial number A41823133, is a deceptive photomechanical production on two pieces of paper, with distributed silk fiber between them in imitation of the genuine. The seal, denominational design, and serial number are all lighter than the genuine in color. The printed face of the note is nearly an eighth of an inch short and the back nearly a quarter of an inch shorter than the genuine.

The word "treasurer" in the italic type under the signature of Roberts is badly printed and the letters imperfectly formed. The fine cross hatching in the background of the portrait of the Indian chief is only suggested in the counterfeit, where these lines appear much coarser than in the genuine and badly broken. The lines forming the shading of the blue denominational figure on the left face of the note are thicker than the genuine and are much broken. On the back of the note the words "this certificate is receivable, etc.," are very badly reproduced, the lines being much broken and the letters imperfectly formed.

The word "five" appearing on the back of the note immediately to the right of the panel containing the words "United States of America" is very imperfectly reproduced. Under the first "A" in America in the panel referred to on the back of the note there is in the genuine a small unshaded space, which is entirely filled up in the counterfeit. The shading under the words "United States of America" in the counterfeit looks like a picket fence in very bad repair, instead of being regular in its formation, with the lines running all the way from the dark shading to the bottom of the panel. The color of the back very nearly approximates that of the genuine, being a trifle darker green. This note made its appearance in Philadelphia.

New Counterfeit \$5 Silver Certificate (Indian Head)

CHECK LETTER D.

Mr. John E. Wilkie, Chief of the Secret Service, reports a new counterfeit as follows: Act of Aug. 4, 1886; series 1899; check letter D; face and back plate numbers indistinct or missing; W. T. Vernon, Register; Charles H. Treat, Treasurer. The serial number of the only note thus far seen is D17278366.

This is a dangerous and deceptive counterfeit, the face of which is apparently a photographic platinum print. The general effect of this very closely approximates genuine. Color of the seal, denominational design and numbers is darker than genuine, the seal being particularly bad and suggesting brush work. The last three letters of "bearer," the word "on" and the first two letters of "demand" in script, right face of note, appear to have been placed on with a pen or brush. Back of note is deceptive, but is a blue-green and darker than genuine. Whenever note is sharply folded the ink on the back appears to break and scale off. This note is particularly deceptive from the fact that it is printed on genuine paper, which has been obtained by bleaching a note of smaller denomination, probably a \$1 bill. In bleaching the note the color has been taken out of some of the distributed silk fibre lying close to the surface, but the deeply imbedded fibre is still visible in the paper, though the blue has been changed to a purple and the red has been somewhat lightened. This note made its appearance in New England.

New Counterfeit \$5 Canadian Note

SERIES A.

The Bank of Montreal; series A; dated January 2nd, 1904. Fair, though the general appearance of the bill on both sides would immediately attract the attention of any but a most careless handler of money. The paper is much too thick and feels rather peculiar; the portraits are coarse, and the whole work resembles sketches from which plates were made. It will be discovered on close examination that in the counterfeit the fine lines over the heads and faces of the portraits differ from the genuine, for there are few of them, they are not continuous, and in the counterfeit the lines on the coats are very coarse and not well cross-lined, giving the appearance of a sketch done with a pen. An attempt has been made to imitate the lathe work of the counters, but the work is poorly done, being coarse. The numbering is fair.

New Counterfeit \$10 Gold Certificate

CHECK LETTER D.

Act of July 12, 1882; series 1907; check letter D; face plate number 7; W. T. Vernon, Register of the Treasury; Charles H. Treat, Treasurer of the United States; portrait of Hillegas. The number of the sample before me is A1437936.

Note is photo-mechanical production on two pieces of paper with distributed red and blue silk fibre, which is much finer and more hair-like than genuine. Color of seal, denominational "X" and back are all darker than genuine. Portrait of Hillegas is so poorly executed that it should attract instant attention and establish spurious character of note. In upper-boarder design on face of genuine, under line "This certifies there have been deposited in the Treasury of the" there is an ornamental arc finished at each end by a scroll. In genuine this arc, about 1-16th of an inch wide, is marked by a series of distinct and regular perpendicular lines. In counterfeit this arc looks as if it had been executed with a pen, is blurred and scratched, and individuality of perpendicular lines almost disappears. General effect of back, aside from the darker color, is better than face, but close inspection discloses work so inferior that it cannot be mistaken as a genuine production. Note is sufficiently deceptive to make it dangerous among inexperienced or careless handlers of money and all notes of this issue should be carefully scrutinized.

The Secret Service

Bank officers and others in a position to be posted relative to the Secret Service Division of the United States Treasury and the excellent service it has rendered agree with President Roosevelt (regardless of the foolish bickering of some of our Senators and Congressmen) that the usefulness of this department has been restricted, and that measures should be at once taken to give Chief Wilkie an appropriation that is an appropriation—in other words, an appropriation commensurate with the needs of this efficient division of the Treasury Department.

President Roosevelt correctly remarks that if the Government is to act with full efficiency against criminals it must have some force of Secret Service agents who can act against criminals anywhere.

"It is the contention of the executive branch of the Government," he says, "that it should be permitted to use the best means of investigating criminal cases, and when legislation is enacted that deprives the executive branch of a particularly desirable and effective investigating force the Government's interests, which are the interests of the people, are injured, and the only gainers are the evildoers who may thereby escape detection and punishment.

"The question is, is it right or wise or proper specifically to discriminate against one particular division of the Government's investigating forces and prevent its employment where it might be used to great advantage? It is an evasion of the question to answer that in one particular and circumscribed field, suppressing counterfeiting and protecting the President, its activities are not affected by the limitation."

Chief Wilkie has testified that the limitations thrown around the use of the service last year had prevented his men from serving only in internal revenue cases and in the Agricultural Department, there being no funds for these services except the appropriation carried under the limitation in the Sundry Civil Bill, and he is right.

He argues for the establishment of a Secret Service Bureau under the Department of Justice. Such a bureau, he said, would have jurisdiction over all Federal crimes at the discretion of the Attorney-General, on the initiative of the District Attorneys.

United States Banking in 1908

The history of the financial disturbance of the autumn of 1907 is retold, so far as it affected the United States, in the report of the United States Comptroller of the Currency for this year. One striking indication of the severity of its crisis and its influence upon the trade of the country is the fact that between Aug. 22 and Dec. 3, 1907, the volume of loans and discounts were reduced to the extent of \$93,246,874, standing on the latter date at \$4,585,337,095. There was a reduction of \$146,943,371 in the amount due from banks and bankers, \$21,422,472 in specie and \$19,416,324 in legal tenders. The liabilities of the banks on account of individual deposits declined from \$4,319,035,403 to \$4,176,873,717 or \$142,161,685; and the liabilities to other banks decreased to the extent of \$207,607,182.

The only material increase in resources was in the item of United States bonds deposited as security for circulation, the increase being \$62,051,920.

A further decrease of \$163,000,000 in the volume of loans and discounts occurred between Dec. 3 and Feb. 14. By May, confidence was beginning to be restored and the period of extreme caution had passed. Thus, by the 14th of that month, the amount of loans and discounts had risen by \$106,000,000, and by the middle of July by another \$87,000,000. On Sept. 23, loans and discounts reached the highest amount in the history of the American banking system, standing at \$4,750,612,731.

It is interesting to recall the fact that in the few weeks following the so-called currency famine, three national banks, eight State banks and four trust companies located in the City of New York failed or suspended with aggregate liabilities to depositors and

other creditors of about \$110,000,000. Of these one of the National banks resumed business, the second has paid its creditors in full, while the third has paid 95 per cent., and within the near future creditors will be paid in full. All of the State banks referred to have resumed business with one exception. In this case, depositors have been paid in full by a trust company which took over the business. Three of the four trust companies have resumed, and provision has been made for the payment of claims of the creditors of the company which did not redeem.

The acuteness of the panic was early relieved by the addition of over \$500,000,000 to the currency medium in circulation, imports of gold during November and December amounting to \$100,000,000. The stock of gold, silver and legal tender decreased between August and December by nearly \$41,000,000, but as in the case of loans and discounts, a new record was reached by Sept. 23. On that date the cash holdings had increased by \$207,700,000, the actual amount being \$868,424,070, which is the largest amount of money ever reported by the National banks as being held in their tills and vaults.

The following figures give the aggregate resources of the National banks at various dates: Dec. 3, 1907, \$8,500,000,000; Feb. 14, 1907, \$8,400,000,000; May 14, 1907, \$8,594,622,698; July 15, 1907, \$8,714,064,400; Sept. 23, 1907, \$9,027,260,485.

Note circulation did not suffer until May. The amount increases steadily through the winter, being over \$627,600,000 on Feb. 14. Three months later, outstanding issues had declined to \$614,000,000 and by the middle of July to \$613,600,000, with practically no change between that date and Sept. 23. The rise and fall of deposits was as follow: Dec. 3 \$4,177,000,000; Feb. 14, \$4,106,000,000; May 14, \$4,312,656,790; July 15, \$4,374,551,209; Sept. 23, \$4,548,135,166.

Despite the adverse conditions, the National banks had a prosperous year, earning on an average dividends of 10.89 per cent. The average for thirty-nine is only 8.84 per cent. The number of National banks is 6,873, their aggregate authorized capital stock being nearly \$95,000,000. Loans and discounts, United States bonds and lawful money represent approximately 70 per cent. of their aggregate resources, and a like proportion of liabilities is represented by capital, surplus and profits and individual deposits. The relation of these items has changed but slightly during the past nine years. Loans and discounts represent about 53 per cent., United States bonds 7.5 per cent. and lawful money 9.5 per cent. The relative proportion of capital, etc., to individual deposits last October was as follows:

Capital to individual deposits, \$1 to \$4.94.

Capital to loans, \$1 to \$5.16.

Capital to aggregate resources, \$1 to \$9.80.

Capital and surplus and other profits to individual deposits, \$1 to \$2.69.

Specie and legal tender to individual deposits, \$1 to \$5.24.

The stock of money in the United States on July 1st was reported at \$3,378,800,000, which is \$263,200,000 more than at the corresponding date the previous year. Of the total amount, 10.08 per cent. was held in the Treasury as assets, 40.34 per cent. was in reporting banks and 49.58 per cent. elsewhere. The amount of money in circulation exclusive of coin and other money in the Treasury, but including money in reporting banks, is \$3,038,000,000, or a per capita of \$34.72, as against \$32.22 in 1907.

Difficult Treasury Problems

Whoever is to be the next Secretary of the Treasury will have his hands full. Secretary Cortelyou has had an extraordinary time administering affairs that seem to be moving from bad to worse. We have not yet ascertained who is to assume the extraordinary cares now resting on this office, but the way in which one name after the other is mentioned it looks as if there was some difficulty in persuading the eligibles.

The enormous growth of the deficit, already \$79,000,000 for the current fiscal year, lies at the bottom of most of the problems with which the new Secretary will deal. A revision of the tariff may improve the income, but if business does not improve much more

than it has up to the present, imports will not receive the expected stimulus. People are now complaining that the possibility of a lower scale of tariff duties has put a check on our industries, and if this is the only check the completion of the revision will revive enterprise.

Is the question of maintaining gold payments one of the serious questions which confront the incoming administration? This problem is one that seldom or never arises when there is a good clear surplus or when revenues are in a flourishing condition. Such a state of affairs is likely to coincide with business activity which keeps the bank notes in circulation, while abundant revenues supply the desired basis of gold resources. But with a weakened condition of the Department, all of the evils which naturally inhere in a redundant bank note currency, the continued circulation of the greenbacks, and the presence of an oversupply of silver coin and certificates at once make their influence felt. The situation recalls that following the panic of 1893. But we must always bear in mind there is no loss of confidence in the currency basis as there was at that time. There is no run on the Treasury for gold in the fear that the silver basis may be substituted. There is a larger mass of paper depending on the gold reserve, but there is also the certainty that the gold standard will be maintained. Of course, the necessity for obtaining gold, if it should arise, would inevitably subject the incoming Secretary to a great deal of unpleasant if unjustified criticism.

But criticism is bound apparently to come upon him for other reasons. The Government's bonds seem to be under a pressure for which there is no immediate prospect of relief. This will be increased by the withdrawal of Government deposits, and it will be emphasized by prospective new issues of bonds. The management of the public debt to avoid if possible a market for its securities below par may prove one of the most delicate of the new Secretary's concerns.—Daily Banker and Stockholder.

Another Double Eagle

In the interest excited by the St. Gaudens designs for coins the existence of an entirely different double eagle made by the chief engraver of the United States Mint in 1906 seems to have entirely escaped the notice not only of the general public, says the New York Sun, but even of coin collectors, who usually keep in close touch with everything pertaining to the coinage of this country.

Charles E. Barber, chief engraver of the mint, who executed the designs for the present nickel five-cent piece, the dime, the quarter and the half-dollar, engraved the dies for a new twenty-dollar gold piece when a change in certain United States coin designs was proposed a few years ago. From these dies two specimens were struck, one in gold and the other in base metal, gilded to show the obverse design. The two pieces were placed in the coin cabinet at the Philadelphia Mint, but even the coin experts have overlooked them.

The obverse shows a large head of Liberty of original design. Around the border are thirteen stars, and below is the date "1906." The reverse is distinctly different from any other United States coin design.

A standing female figure fills the centre of the field. She holds aloft in her left hand a pole, surmounted by a tiny Liberty cap, while the right hand is placed on the hilt of a sword, the point of which rests upon the ground. Directly behind the figure is an aggressive looking eagle, with partly opened wings, in an attitude of protection. Behind the head of the figure is a series of radiations, between them being the motto "In God We Trust." Below the figure of Liberty is a fasces placed in a horizontal position.

The edge of the gold pattern coin contains a series of stars in rather high relief instead of the usual reeded edge, while the edge of the piece struck in base metal is smooth.

The cabinet at the Mint contains other pattern pieces, of which little is known. The reverse design of this double eagle was used by Engraver Barber as the obverse of a half-dollar pattern piece struck in 1891, a specimen of which is on exhibition. On the reverse of this 1891 fifty-cent piece was a small spread eagle, with wreaths, stars and a band of clouds above, similar to the reverse designs of the silver and gold pieces issued during the early part of the nineteenth century.

Another half-dollar pattern piece of 1891 has been pronounced unusually handsome. It shows the same kind of certain device as the first half-dollar, but without the wreath, thus permitting the design to stand forth prominently.

These patterns and others were executed in anticipation of the change in design which took place in 1892, when the well-known device of a seated figure of Liberty, used since 1840, gave way to the bust of Liberty now familiar.

Bank of Hochelaga

With much money available for lending purposes, said Mr. F. X. St. Charles, president of the Banque d'Hochelaga, at the annual meeting, the bank would be in a position during the coming year fully to accommodate its customers and render them all the financial assistance necessary. He referred to the strong position which that institution continued to hold, and was able to present a very encouraging report on the past year's operations. Mr. St. Charles explained that the \$150,000 increase in the reserve fund put that account at \$2,150,000, or equal to 86 per cent. of the capital of the bank. The reserve is thus approaching the point when it will be equal to the paid-up capital of \$2,500,000. Deposits for the twelve months show an increase of over \$4,000,000, while quick available assets amount to \$6,890,098, which is equal to 46 per cent. of the bank's total liabilities. The net earnings for the twelve months are \$381,387, or about 15¼ per cent. earned on the paid-up capital. The bank has paid the sum of \$200,000 in interest at the rate of 8 per cent. per annum; written off bank premises, \$15,140; added to the pension fund, \$5,000; and carried forward to profit and loss account, \$31,723.

The old board was re-elected as follows: Mr. F. X. St. Charles, president; Mr. Robert Bickerdike, M. P., vice-president; the Hon. J. D. Rolland, J. A. Vaillancourt, A. Turcotte, E. H. Lemay, J. M. Wilson, M. J. A. Prendergast, general manager; C. A. Giroux, manager.

Bank of Hamilton (Ontario) Statement

Through the depressed conditions of the past twelve months, the Bank of Hamilton has thriven well and produces a statement for the twelve months showing net profits of \$360,308, which is practically 15 per cent. on the outstanding capital of \$2,472,860 and only \$24,400 less than the profits of the previous year. With the \$217,950 brought forward from the last account, and \$2,500 received on premium on new stock, this makes a total of \$580,758. Out of this, \$247,161 is appropriated for the usual quarterly dividends (10 per cent. in all), \$2,500 is added to reserve and \$25,000 is written off bank premises. In addition, a sum of \$5,000 is allotted as an allowance to the ex-president as authorized by the shareholders, the balance of \$301,097 being carried forward to the credit of profit and loss.

Deposits by the public have increased from \$24,216,967 a year ago to \$25,783,391, or over \$1,500,000. The readily available assets are \$12,647,972, against liabilities to the public of \$28,289,000, a reserve of about 45 per cent. The total assets are \$33,610,837.

Bank of Richmond

The banking institutions of the South are attracting attention, not only by their up-to-date and conservative methods, but also by their rapid and healthy growth. Among the number attention is particularly attracted to the Bank of Richmond, of Richmond, Va. This institution began business Sept. 1, 1904; on Feb. 27, 1908, deposits were \$2,511,761.32; on Nov. 27, same year, they had increased \$359,000 to \$2,870,769.90. But even this remarkable increase was outdone, for between Nov. 27, 1908, and Jan. 1, 1909, not much more than one month, the deposits had increased \$1,133,001.07, to a total of \$4,003,770.98, a most wonderful exhibit. The Bank of Richmond has the largest capital (\$1,000,000) and surplus (\$481,000) of any State bank in the South Atlantic States, and is the depository for the State of Virginia and also for the City of Richmond. The officers are: John Skelton Williams, president; Frederick E. Nolting, first vice-president; T. K. Sands, second vice-president and cashier; H. A. Williams, assistant cashier; L. D. Crenshaw, Jr., trust officer.

Following is the statement and condition of the Bank of Richmond at the close of business Dec. 31, 1908: Assets, \$5,511,591.31. Liabilities—Capital stock, \$1,000,000; surplus and profits, \$481,824.07; interest reserve, \$15,479.85; reserved for taxes, \$10,262.41; dividends uncollected, \$254; deposits, \$4,003,770.98.

Michigan's Proposed Bank Law

The outline of a proposed new banking law for the State of Michigan was made public at Detroit on Feb. 5 by Hal H. Smith, attorney for the Michigan Bankers' Association. It is issued in the form of a report of a special committee of the association as amended and adopted by the association's executive council. It has also been approved by State Banking Commissioner H. M. Zimmerman and is said to have met the approval of most of the members of the banking committees of both the State Senate and the House of Representatives. The bill makes it a felony punishable by a fine not exceeding \$1,000 or imprisonment not exceeding five years to make or use false statements to obtain credit. The making or circulating of false rumors derogatory to a bank is also made a felony. The salary of the Commissioner of Banking is raised from \$2,500 per year to \$5,000, and the Deputy Commissioner is given \$3,000 per year. Examiners are required to pass an examination as to their competency and are to receive \$1,500 the first year and an increase of \$250 each year up to a maximum of \$2,500. Bank directors are required to hold monthly meetings of which a record must be kept. When the stock of a solvent bank is impaired the Banking Commissioner is authorized to assess the stockholders proportionately to their holdings, payment to be made within sixty days and the stock of defaulting stockholders to be sold by the Commissioner.

A Virginia Bank's New Home

The Virginia Bank & Trust Co., of Norfolk, Va., has erected a new building, which cost \$80,000. It is a first-class fireproof structure, the exterior being a combination of Indiana limestone, with metal filling between the bays in somewhat the same general style as that used in the treatment of the building of the Knickerbocker Trust Company, in New York City. The architectural order employed is Greek-Ionic.

On Granby Street, where the main entrance is located, the width of the lot permits of but one bay, which forms the entrance motive of the entire building. Through the doorway on this facade one approaches the bank as well as the elevator and stairway hall to the offices above.

On Main street the building is treated with a colonnade of Ionic columns, and the space between these columns is entirely filled with metal and glass. The ornamental iron work has been so designed as to make the entire building appear as a one-story structure; in other words, the floor lines have not been accentuated except in a subordinate way.

The interior of the banking room is of Caen stone, with ornamental plaster ceiling, and the banking room screen is of Pavonazzo marble, with bronze grill above. The furniture and all of the woodwork is mahogany.

In planning the arrangements of the bank proper, the public space has been placed in the centre, with the clerk space surrounding it on three sides. To relieve undue congestion at the door, the tellers' cages have been placed at the far end of this screen.

The offices of the president and cashier will be near the entrance, in order that they may be readily accessible to the public, and that these officers may control the entire bank. The directors' room will be located above the vault on the Mezzanine floor, and from this room one may obtain a view over the entire banking room.

The Virginia Bank & Trust Company, Inc., began business in 1902 with a capital stock of \$100,000, since which time its business has steadily grown, its capital having increased to \$600,000 about a year ago. The officers, who are representative business men of Norfolk, are: Mr. James W. Hunter, president; Captain John L. Roper, first vice-president; Captain William C. Whittic, second vice-president; Mr. Hugh C. Whitehead, cashier; Mr. Wash. Reed, Jr., assistant cashier, and Mr. Walter H. Taylor, general counsel.

Money Counting by Experts

There is, broadly speaking, but one place in the United States where new money is always to be found in circulation. Very nearly everywhere else is to be found ragged, dirty, not to say filthy, paper money, germ-laden and disease-breeding. The question has often been put: Why is this?

Congress makes appropriations amounting to, approximately, \$800,000,000 annually for the Government expenses. This enormous amount, which is backed by gold and silver in the Treasury vaults, is printed every year in Washington and is issued through the Treasury Department. It must be recollected that, while banks all over the country issue old notes, the Treasury never issues anything but new money. That is why the money in Washington is always new.

There are over 30,000 Government employees at the National capital, and they are

paid in bright, new notes twice every month. They distribute their money for the necessities of life, and hence a great deal of it is found in circulation.

Another question with reference to the money supply is often propounded: How long does it take for the women experts in the Treasury Department to count a million new \$1 notes, and how long does it take to count a million old notes of that denomination? According to the Treasury officials, the answer is as follows:

In handling new notes an expert could count in a day of eight hours about \$50,000. Of course, this refers to notes of the denomination of \$1. In counting gold certificates of the denomination of \$10,000 each, it would require but a short time to count \$1,000,000.

At this rate 20 days would be occupied in counting \$1,000,000 represented by notes of the denomination of \$1. However, it is hardly possible that any one could keep up to these figures for such a period, and it would be safe to add five days and to say that \$1,000,000 (paper) could be counted in 25 days.

Of silver dollars 40,000 may be counted in a day of eight hours, which rate if adhered to would finish the \$1,000,000 in 25 days, but it would be well to add five days here for the same reason and make it 30 days for counting 1,000,000 silver dollars.

In counting old notes the conditions are much changed. There are five different kinds of paper money—gold certificates, silver certificates, United States notes (greenback), Treasury notes of 1890 and National bank notes. Remittances of mutilated currency may contain all these different kinds of currency. They may not be assorted properly by denominations and may be badly mutilated. Where cases of this kind occur the count is tedious and slow, but, assuming that the currency sent is in accordance with the regulations, an expert could, on an average, count \$15,000 in \$1 notes a day. This would require about 70 days to count a million \$1 bills in old notes of various kinds of paper currency.

Perforated Coins Unpopular in this Country

The recent issue by the German Government of a twenty-pfennig piece with a perforation in the centre recalls the various efforts which have been made in this country to popularize this Oriental notion. They have been numerous, but for some reason the coins never were in favor.

The first United States coin to show a perforated centre was a gold dollar issued in 1849. It had a square hole in the middle of the planchet, which was surrounded by a wreath of laurel. It was the forerunner of the gold dollar issued by the United States Mint in 1849. This coin was issued only in gold, and was engraved, not struck from dies. Specimens are now held at a premium of \$20 or more.

The next United States coin with a perforated centre was struck at the Philadelphia Mint in 1850, and was of the denomination of one cent. It was about the size of the little bronze cent now in use; at the time of its issue the large, old-fashioned copper cent was still in general circulation. The designer reasoned that by means of the perforation persons would be able by the touch to distinguish in the pocket the cent from the dime, and the coin received the name of "ring cent."

There were several other varieties of this coin, showing that the Mint authorities took pains to design a coin that would answer all requirements. These pieces were struck with both pierced and perfect centres in silver, copper, nickel and composition metal, and embraced altogether six varieties, without counting the various metals. None of the designs met the favor of the Government authorities and none was issued for circulation. As they were struck in considerable numbers, they now bring but a small premium, which ranges from \$1 upward.

The Mint engravers seem to have been not at all discouraged by the failure of these designs, and in 1852 they made still another effort to produce a perforated coin. This is one of the scarcest of the perforated coins.

Another variety of the gold dollar of the same year bore on the obverse at the top the letters "U. S. A." On the reverse was a circle composed of sprigs of laurel. A number of varieties of this gold dollar were struck on thick and thin planchets in gold, silver, nickel and copper. Those in gold are the rarest of the perforated dollar pieces.

In 1852 was struck the only gold half dollar ever produced at the United States Mint. Notwithstanding the general impression, the gold fifty-cent pieces with which people are familiar were not an issue of the United States, but were manufactured by California jewelers. The 1852 gold half dollar had a perforation in the centre, and the obverse design showed a wavy circle around the perforation, with the inscription "United States of America" around the border. The reverse was blank. The coin was exactly half the weight of the dollar. This half dollar is known only in gold, and one of the two specimens of the coin known brought \$31.

The last attempt to introduce perforated coins in the United States is represented by two pieces issued at the Philadelphia Mint in 1884. They were of the denomination of one and five cents.

Things Used as Money

Where is the money? is a question that many people have recently been asking. Money has sometimes been a result of curious local necessity or convenience. In the United States, for example, many things have been recognized legally as money, quite apart from the metal and paper currency we now possess.

While most people have heard of the wampum shell currency of early times, it may not be so generally known that cows were once recognized as legal tender in Massachusetts. It was quite a long time ago, of course, but nevertheless it is a fact that cows were receivable for taxes in the old Commonwealth. But this cow money proved to be extremely unsatisfactory to the State Treasury.

In framing the statute the early financiers merely spoke of "a cow," and it does not require a brilliant imagination to perceive how the shrewd Yankee farmers took advantage of such an elastic designation. "A cow" might be interpreted to mean any old bovine creature that could totter along on four legs, so pretty soon the Ancient and Honorable Commonwealth of Massachusetts became the possessor of a herd of such venerable cows, such scrawny and woful-looking cattle, that in the face of financial disaster the statute making cows legal tender had to be repealed.

With more success the Federal Government long maintained a momentary system of cattle rents with some of the Indian tribes. Presumably the Indians lacked the shrewdness of the Yankee farmers in such transactions, for so far as is known Uncle Sam never had occasion to register any kicks regarding the age and condition of his cattle taxes.

From cows to bullets seems like a jump, indeed, but it was with a watchful eye on the Indians that the State of Connecticut made bullets legal tender. In order that every settler might have a plentiful supply of bullets on hand it was enacted that a bullet should be worth a farthing, or about half a cent of our money.

In the early days of the United States furs and skins were very generally transferred from hand to hand as money. Thus, in the Northern States a pound of beaver was regarded as the unit of value, and in the South the same weight of deerskin performed a similar function. In the Far West furs retained a currency value until quite a recent date. But, after all, as a bale of skins was rather a bulky roll of money to carry about, it was customary to cut off small trips as tokens of ownership and pass them from hand to hand, while the skins were deposited in recognized places of security. Proof of rightful ownership was demonstrated when the strip was fitted to the part from which it had been detached. Trickery in substituting another skin was not so easy as might be imagined, because it seldom happened that two skins would prove so exactly similar in shade and length of fur where the strip was cut off as to deceive even the eye of a novice.

A significant if not sinister form of currency once forged at Newport, Boston and New York was known as African Iron. This African Iron was in the shape of bars, and was principally used in the slave trade. The ratio of exchange was 12 bars of iron to a pound of sterling, or \$5 of our money. Thus in the fitting out of the Jolly Bachelor at Newport the account is set forth as: "Four buckner guns, at 6 bars; two small guns, at 4 bars; six cutlasses, at 6 bars; powder, at 7 bars," etc. To this was added several boatloads of rum at 2 bars each, the whole costing 744 bars. Finally, when the Jolly Bachelor returned, after what he would now regard as the reverse of a jolly trip, a negro slave was itemized as worth 6 bars, or \$30.

In Colonial times, and, indeed, after the independence of the United States had been established, tobacco was legal tender in the Southern States. Thus in Maryland and Virginia all Government fees and taxes were payable in tobacco until 1806, when Federal money was substituted. But in the meantime the District of Columbia had been ceded to the Federal Government, with such laws as were in force there, unless specifically altered by Congress. So, as a consequence of the pressure of other work and interests upon Congress, tobacco remained legal tender in the District of Columbia until recent times. As late as 1883 the fees of the Clerk of the Supreme Court, for example, in any transaction where the Federal Government was itself a party were still appraised in pounds of tobacco and settled at the Treasury by the old standard of valuation. It is possible that there remain some exceptional fees overlooked by Congress which may still be settled in tobacco.

Apart from these forms of American currency, dried cod has passed as such in Newfoundland, playing cards in Canada and salt in Mexico, while beyond this continent almost every conceivable article has been regarded as money, from nails in Scotland to bricks of tea, which are now the unit of value in some parts of Manchuria. As to the metals, lead, tin, iron and brass were tried before giving place to gold, silver and copper. But in this matter of currency there remains the curious exception to the above rule that, considering the high value all nations have set upon precious stones, there is no record to prove that they have ever been used as money, unless the turquoise heads of our New Mexican Indians may be so regarded.

A Trenton Bank Episode

The announcement of its 20th semi-annual dividend by the Trenton Banking Company a short time ago attracts attention to the venerable and substantial character of this highly respected institution. It has witnessed the passage of several generations of business men, was in Trenton when it was a village, has grown with the city's growth, successfully withstanding half a dozen National panics, and to-day is a landmark in the financial world to which Trentonians point with pride and confidence. As bringing more vividly to mind the hoary age of the institution, we are tempted to refer to a significant incident, not generally known, which is related in "Chittenden's History of the American Fur Trade of the Far West," published a few years ago. On page 146 of this valuable work mention is made of the misfortune of a party of American fur traders in being attacked by a band of Indians along the Missouri River in the year 1810, resulting in the murder of the white men and the carrying away of considerable booty. The plunder included "fine cotton shirts, beaver traps, hats, knives, dirks, handkerchiefs, Russia sheeting hents, and a number of bank notes, some signed New Jersey and Trenton Banking Company."

The Trenton Banking Company was chartered December 3, 1804, and therefore its notes must have been in wide circulation six years later, when this blood-curdling massacre occurred. Just how they got into the hands of the ill-fated traders who were plundered and killed is a matter of speculation, but not unlikely they had been the property of Wilson Price Hunt, a Trentonian, who was associated with John Jacob Astor in the attempted founding of an American fur-trading headquarters at the mouth of the Columbia River, on the Pacific coast. The Astor Company was organized in 1810, and Mr. Hunt led the overland party from St. Louis en route to the Pacific. The thrilling narrative of his many perils and adventures in an unexplored country and amid hostile Indians is picturesquely told in Washington Irving's "Astoria," which every American, and especially every Trentonian, should read. Mr. Francis B. Lee, the historian, has obligingly furnished the history family history of this daring spirit, as follows:

Wilson Price Hunt was the grandson of Wilson Hunt, of the Hunts of Newtown (L. I.), Hopewell, N. J., and Trenton, his grandmother being Susannah Price. Abraham Hunt, the Trenton merchant, in whose house Colonel Rall, the Hessian commander, became drunk the night before the famous Battle of Trenton, was an uncle of the man who led the Astoria overland expedition. His father's name was John Price Hunt. The Astoria hero was born at Hopewell and served as a clerk, while a youth, in the Trenton store of his uncle, Abraham. After his adventurous career in the Western wilds, he settled at St. Louis and died there in 1842. Captain Hunt, of the Sixth Ward, whose loss at sea, is one of Trenton's local traditions, dating over fifty years back, was of the same Hunt family.

The Trenton Banking Company's lengthy career brings Trentonians of to-day in closer touch than many of them have hitherto realized with those stirring pioneer years when the nation was still largely an unexplored wilderness and the Indian roamed over the entire West with only feebly disputed sway.

Merchants' Bank

The statement at the annual meeting of the Merchants' Bank (of Canada) showed that institution to be in a strong position, although the net profits, amounting to \$738,597, were less than those earned the previous year. This, as the president explained, was because conditions had been less favorable than in 1907. The report shows that interest bearing deposits have grown considerably, while call loans, which figure at nearly \$11,000,000, have increased under a slowing down of trade activity, the latter yielding a substantially less return than at any date for many years back. After paying the usual dividend of 8 per cent., the directors have disposed of the surplus earnings by writing down bank premises account \$100,000, contributing \$25,000 to the officers' pension fund, and carrying forward the balance to undivided profits account, which has now reached the total of \$400,997.

Referring to the world-wide stringency of the past year, the president said that without claiming any undue prescience, the directors had early indications of the coming storm and prepared for something of the kind well in advance. Their course through the pressure had thus been made much easier and without stress to the bank's extensive discounting clientele. Meantime, a clearer financial outlook had supervened, and the directors looked from now on to a gradual revival of general trade, following upon an excellent crop in the Northwest and good prices.

Subsequently the board of directors were re-elected with the exception of Mr. Bryce J. Allan, who temporarily replaces Mr. C. R. Hosmer, resigned. The members are: President, Sir H. Montagu Allan; vice-president, Mr. Jonathan Hodgson; Mr. Thomas Long, Mr. C. F. Smith, Mr. Hugh A. Allan, Mr. C. M. Hays, Mr. Alex. Barnet, Mr. F. Orr Lewis, Mr. Bryce J. Allan.

Steam as Burglar Defense

Blasts of steam, superheated and kept under such pressure as to flood the entire building in a few minutes, will be the main scheme in a deadly system of defense that the National City Bank relies upon to make its new home in Wall Street the most impregnable financial fortress in the world.

Wall Street for years has fortified itself against a possible invasion by a mob or a concentrated attack from hundreds of burglars, and all its strong rooms and safes have been built of the most thief-proof material at hand, but the National City Bank is the first to adopt steam as a method of defense. Around the bank's great safe, which is of the usual burglar proof construction—tons of armored steel, reinforced concrete, iron rails and meshes of sensitive alarm wires—is a system of steam pipes that, should all other means fail to frustrate robbers, would snuff out the lives of scores of burglars should they continue to work near the safe, or would stand off hundreds of men for an indefinite length of time if it did not suffocate them before they could escape from the building.

The great safe, or strong room, which weighs three hundred tons, is twenty feet high, twenty-four feet long and about fifteen feet deep. It is built in two stories, the upper section rising from the centre of the main floor and the lower section extending into the basement, where it rests on wide marble legs like some gloomy sarcophagus. These legs are about five feet high and allow from the basement at all times a full view under the safe.

Looming up from the centre of a great square of bronze railed cages and small rooms, the safe, finished in dull gray, looks like a section of a warship in battle paint among a fleet of brass-railed and brass-trimmed yachts, and entering one of its doors gives the impression of stepping into a turret of one of the great battleships, a huge steel hinge much like a miniature crane swinging the sixteen-ton doors instead of an ammunition hoist. Highly polished steel cross bars on the outside of the circular doors make them look like the breeches of thirteen-inch guns.

The armament of the vault is about a foot and a half thick; first a half-inch plate of steel, then half an inch of wire mesh made up of sensitive wires that stretch off in a score of different directions to alarm stations. After the wire mesh there is a half-inch plate of steel, then eight inches of railroad iron and concrete, and, last, five inches of armor plate.

Running around the middle of the vault directly under the bank floor, which is provided with a grating to allow of a perfect draught from underneath, is the system of steam pipes which the bank officials depend upon to do final execution should all other protection fail. These pipes are four inches in diameter, perforated with wide valves at intervals of about twelve inches, and are connected with mains that lead to the boilers. Should a burglar or any number of them penetrate the first layer of steel and then the wire mesh without giving an alarm, all the valves can be opened by a single turn of a wheel in any of a dozen places throughout the building, sending out a flood of steam that will completely envelop the safe in less than half a minute.

Should a sudden invasion from an underground passage be made simultaneously with the entry from the street of hundreds of men, all the valves would be kept wide open until the stifling, burning vapor filled the entire basement and the banking chamber clear to the top of the seventy-two foot dome, killing all those unable to make their escape.

The National City Bank is within less than four years of being one hundred years old, and James Stillman, who recently retired, had been its president for more than seventeen years. The bank and the war of 1812 started together, and in the first year of its existence it took a hand in federal financing, subscribing \$500,000 to the Government loan of 1813. Moses Taylor, to whom much of the success and prosperity of the bank was due, was for forty-five years a director and for twenty-six years its president. In the ninety-six years of the bank's life it has had, besides Mr. Stillman and Mr. Taylor, eight other presidents and has, of course, been identified with the greatest financial transactions of the country. Mr. Stillman, upon retirement, was succeeded by F. A. Vanderlip, formerly vice-president. The other vice-presidents are William A. Simonson, Horace M. Kilborn and James A. Stillman, and among the directors are many men prominent in the most important civic, philanthropic and educational movements in the city.

The total assets of the bank recently touched the record figures of \$372,849,000. A few months ago the cash reserve was nearly \$100,000,000, while in November the gross deposits reached \$308,778,000.

Gold Coined in 1907

The annual report of Frank A. Leach, Director of the Mint, covering the operations of the mints and assay offices for the fiscal year ended June 30 last, says that the original deposits of gold bullion in the mines and assay offices during the fiscal year 1907 amounted to \$207,415,984. Uncurrent United States gold coin of the face value of \$4,020,668.50 was received for recoinage. Silver bullion purchased for subsidiary silver coinage during the year aggregated \$18,819,279.14 standard ounces and mutilated and uncurrent United States silver coin of the face value of \$1,162,982 was received for recoinage. There were purchased 535,833.34 ounces of silver bullion for the Philippine Government, the cost of which, \$295,054.78, was reimbursed to the United States by that Government.

The coinage executed by the mints during the fiscal year 1907 amounted to \$197,238,377.50 in gold. Of this amount \$106,182,420 were in double eagles and \$4,829,060 in eagles of the designs prepared by the American sculptor, the late Augustus Saint-Gaudens. The amount of subsidiary silver coinage executed was \$16,530,477.25, which is the largest subsidiary silver coinage executed in any one year since 1877, when the Government was preparing for the resumption of specie payments, issuing subsidiary silver coins in redemption of fractional currency. The amount of minor coinage executed was \$1,946,008.22.

There were coined for the Government of the Philippine Islands 25,003,915 pieces of silver coin of the value of 18,131,793.20 pesos and for the Government of Mexico 1,397,291 silver 50 centavo pieces.

The Director of the Mint estimates the production of gold in the United States during the calendar year 1907 to have been \$90,435,700 and silver for the same period 56,514,700 fine ounces of the commercial value of \$37,290,700 at the average New York price of silver for the calendar year 1907, namely, 66 cents an ounce.

The Director of the Mint estimates the production of the precious metals in the world during the calendar year 1907 to have been \$410,555,300 in gold and 185,014,623 fine ounces of silver of the commercial value of \$122,090,000, at the average price of silver for the year. The increase in the production of silver for 1907 over that of 1906 was 19,260,000 fine ounces.

The consumption of the precious metals in the United States in the industrial arts during the calendar year 1907 is estimated to have been in gold \$40,727,000, and in silver 24,369,784 fine ounces. Of the gold consumed in the arts \$33,549,495 was new material and \$7,177,575 in old material. Of the silver used in the arts 3,137,243 fine ounces are new material and 2,232,000 fine ounces of old material.

The total receipts of the mint service during the fiscal year 1907 amounted to \$10,942,900.98. Of this amount \$8,713,413.35 were profits on the coinage of subsidiary silver, and \$1,527,958.29 profits on the manufacture of five-cent nickel and one-cent bronze pieces. There were collected from the Government of the Philippine Islands charges for the execution of coinage for those islands amounting to \$203,287.72 and from the Mexican Government for coinage executed for that Government \$9,114.22, the balance of \$489,127.49 being derived from charges on deposits, the manufacture of medals and from miscellaneous sources.

The stock of gold coin in the United States June 30, 1908, is estimated by the director to have been \$1,535,169,328, and the stock of silver coin \$715,615,595, including \$568,259,812 in silver dollars. The stock of gold bullion held by the Treasury on June 30, 1908, amounted to \$79,971,247, and the silver bullion (cost value), \$7,979,000.

The stock of gold coin in the world on Jan. 1, 1908, is estimated to have been \$7,014,600,000, silver coin \$3,530,700,000 and the uncovered paper \$4,302,500,000.

The First National Bank of Chattanooga, Tenn., is one of the old banking institutions of the South, having been chartered in 1865, almost 44 years ago, and during that period the bank has paid in dividends \$1,250,000, every dollar of which has been earned, still having on hand, in earned surplus and undivided profits \$288,545.37, a most remarkable and healthy record. Following are the officers: Chas. A. Lyerly, president; H. S. Chamberlain, vice-president; J. T. Lupton, vice-president; C. C. Nottingham, vice-president; J. P. Hoskins, cashier; W. H. DeWitt, assistant cashier.

Fidelity Trust Company of New York.—Jan. 1.—Resources, \$6,015,988.41. Liabilities—Capital, \$750,000; surplus, \$750,000; undivided profits, \$150,000; reserve for taxes, \$1,947.80; interest accrued payable, \$14,259.96; deposits, \$4,500,000. When it is taken into consideration that the Fidelity Trust Company began business May 22, 1907 (only twenty months ago), deposits of \$4,500,000 and undivided profits of \$150,000 make a wonderful showing, and bespeaks well for the officers of this well-managed banking institution. The Board of Directors of the company on Dec. 16, 1908, declared a semi-annual dividend of three per cent. on the capital stock of the company. Officers: President, Samuel S. Conover; vice-presidents, Wm. H. Barnard, John W. Nix; secretary, Andrew H. Mars, assistant secretary, Stephen L. Viele.

The Hibernia Bank of Savannah, Ga.—Dec. 31, 1908.—Resources, \$1,167,411.71. Liabilities—Capital stock, \$200,000; surplus, \$100,000; undivided profits, \$11,420.56; dividends payable, \$6,005; reserved for interest, \$3,000; deposits, \$677,679.45; bills payable, \$169,306.70. This is indeed a remarkable increase in business in only nineteen months, for the Hibernia Bank of Savannah started business May 1, 1906. The officers are: M. A. O'Byrne, president; Charles Ellis, first vice-president; Louis P. Hart, second vice-president; Joseph W. Heffernan, cashier; James P. Doolan, assistant cashier.

United States Deposit and Savings Bank, New Orleans, La.—Dec. 31.—Resources, \$1,621,317.91. Liabilities—Capital stock, \$100,000; surplus (earned), \$100,000; undivided profits, \$20,956.74; 3 per cent. dividend declared, \$3,000; individual savings deposits, \$1,283,051.22; individual deposits, subject to check, \$14,309.95. A. B. Wheeler, president; George P. Ager, first vice-president; H. T. Howard, second vice-president; William F. Pinckard, third vice-president; W. L. Miltenberger, cashier; J. R. Juden, assistant cashier and custodian.

The National Bank of Commerce, Norfolk, Va.—Nov. 27, 1908.—Resources, \$7,401,138.23. Liabilities—Capital stock paid in, \$1,000,000; surplus and undivided profits, \$615,396.68; circulation, \$650,000; bond account, \$28,000; due to reserve banks \$300,000; deposits, \$4,807,741.55. Nathaniel Beaman, president; Tazewell Taylor, vice-president; Hugh M. Kerr, cashier; M. C. Ferebee, ass't cashier; F. A. Porter, ass't cashier.

The Murchison National Bank, Wilmington, N. C.—Nov. 27, 1908.—Resources, \$4,596,237.35. Liabilities—Capital, \$550,000; surplus and net profits, \$298,134.69; circulation, \$550,000; U. S. bond account, \$100,000; deposits, \$3,098,102.66. H. C. McQueen, president; J. V. Grainger, vice-president; J. W. Yates, vice-president; C. S. Grainger, cashier.

Third National Bank of Atlanta, Ga.—Nov. 27, 1908.—Resources, \$4,333,942.76. Liabilities—Capital, \$500,000; surplus, \$500,000; net profits, \$96,164.62; circulation, \$248,500; re-discounts, \$79,000; bills payable, \$50,000; deposits, \$2,860,278.14. Frank Hawkins, president; Jos. A. McCord, vice-president; H. M. Atkinson, vice-president; Thomas C. Erwin, cashier; R. W. Byers, ass't cashier.

The National City Bank, Memphis, Tenn.—November 27, 1908.—Assets, \$690,557.23. Liabilities—Capital stock paid in, \$179,595; profits, less expenses and taxes paid, \$3,309.78; circulation, \$54,000; rediscounted notes, \$25,008.40; bills payable, \$30,000; deposits, \$398,644.05. Opened for business July 9, 1908; Deposits July 15, 1908, \$193,276.11; deposits Sept. 23, 1908, \$246,680.16; deposits Nov. 27, 1908, \$398,644.05—a period of four and one-half months is very satisfactory and also shows a rapid and steady growth, speaking well for the officers and management of the bank. H. H. Crosby, president; T. J. Keyler, vice president; J. M. Speed, vice president; Wm. H. Klye, cashier; S. W. Portlock, ass't cashier.

Germania Savings Bank and Trust Co., Memphis, Tenn.—Dec. 31, 1908.—Resources, \$531,546.23. Liabilities—Capital stock, \$25,000; surplus, net, \$25,000; contingent fund, \$6,255.95; net earnings past six months, after paying interest on all savings accounts entitled thereto, and taxes, \$5,034.73; dividends unpaid, \$265; deposits, \$469,990.55. Harry Cohn, president; H. Bluthenthal, vice-president; J. A. Goodman, cashier.

Commercial Savings Bank, Charleston S. C.—Dec. 31, 1908.—Assets, \$252,553.07. Liabilities—Capital, \$50,000; surplus, \$5,000; undivided profits, less current expenses and taxes paid, \$2,759.58; dividend unpaid, \$3,000; deposits (general department), \$58,865.85; deposits (savings department), \$96,927.64; bills payable, \$36,000. Tristram T. Hyde, president; Courtenay Olney, cashier.

Counterfeit National Bank Notes

The following is a complete list of all counterfeits on the National Banks that have been presented at the United States Treasury Department, and embraces all that are in circulation. National Bank notes are divided into four classes, as follows: *First*, The old series, bearing the small star-pointed seal, and signed by F. E. Spinner as Treasurer. *Second*, The series of 1875, bearing the scalloped seal, and signed by John C. New, A. U. Wyman and Jas. Gilfillan as Treasurers. *Third*, The series of 1882, bearing the large seal (chocolate color), and signed by Jas. Gilfillan, A. U. Wyman and C. N. Jordan as Treasurers. *Fourth*, The series of 1902, bearing the scalloped seal and signed by Ellis H. Roberts and Charles H. Treat as Treasurers. All of these series have been counterfeited. All notes known as the old series (having the star-pointed seal) were printed on plain bank-note paper. The series of 1875, 1882 and 1902 are printed on fibre paper. The series of 1875 have the charter number printed in large bold-faced figures on each end of note. The series of 1882 have the charter number printed in large figures on the note, and engraved in small figures surrounding the face of note; back of note, the charter number is printed in large figures in green panel centre of note. The series of 1902 have the charter number printed in large red figures on each end of note and engraved in small figures in border surrounding the face of note, also one of the following letters in red near the charter number on each end of note: N, E, M, W, S or P, which denotes in which group of States the bank that issued the note is situated. N denotes a New England State, E an Eastern, M a Middle, W a Western, S a Southern, and P a Pacific State.

All notes have the cheek letters A, B, C, D, printed on the face of note in upper and lower corners, diagonally opposite. A few banks have been furnished with notes bearing other letters of the alphabet, of which F, G, M, R and U have been counterfeited.

Photographic notes are not dangerous, as no invention has been perfected by which the various colors on a note can be produced. When a genuine note is photographed, the colors upon the counterfeit, originally, appear in black, the numbers and seals on the notes being in colors. It has been necessary, in order to imitate them perfectly, to color by hand in various ways. On the first counterfeits that appeared of this class the work was done in a careless manner, the tints produced being of a bad color, the black underneath showing through. On many of the recent counterfeits, the tints of the seals and numbers are excellent, but as a general rule photographic counterfeits are not dangerous. This class of counterfeits bear different numbers, and the numbers cannot be relied upon as a means of detection.

ONES

DESCRIPTION OF GENUINE NOTE

On genuine centre of note, vignette representing two females clasping right hands before an altar, to convey the idea of the Union re-established over the altar of our country by the return of peace and the aid of heaven. Left end, large ornamental figure "1" across, on which are words "United States," etc. Back of note, vignette Landing of Pilgrims.
National Bank Notes of all denominations have on back of notes, left end, coat of arms of the State; right end, that of the United States.
No genuine notes of this denomination have been issued since June, 1879.

FIVES

DESCRIPTION OF GENUINE NOTE

On genuine, left end of note, the vignette represents the discovery of the new land, Columbus being the principal figure of a group on the deck of the caravel; right end, Columbus introducing America to Europe, Asia and Africa. Back of note, Landing of Columbus in 1492. In June, 1882, a new design was adopted on the left end, being a beautiful portrait of the late President Garfield. Back of note, the charter number of bank printed in green panel, centre of note, surrounded by lathe-work. The series 1882 notes having brown border backs, while those prior to series 1882 had green border backs. The series of 1902 notes have the portrait of Benjamin Harrison on left side of face of note; the number panel with denomination counters at either end below portrait. On the back is a vignette, Landing of the Pilgrims, with legend and ornamental base, in centre of note.

TENS

DESCRIPTION OF GENUINE NOTE

On genuine, left end of note, vignette represents Franklin, with kite in hand, experimenting with electricity, with assistant seated on rock near him. Leyden jar in foreground and 1752 in lower left corner. Right end vignette represents female on eagle soaring above clouds snatching the lightning, to represent genius of America seizing and utilizing lightning of heaven. On counterfeit the post in vignette, lower left corner, was made perfect or plain; the genuine at one-fourth inch from the ground shows a knot hole or nick. Back of note, vignette represents De Soto discovering Mississippi in 1541. All notes of this denomination prior to series of 1882 had green border backs, and those of series 1882 have brown border backs, with charter number of bank in green panel, centre of note, in place of De Soto vignette. The series of 1902 has portrait of William McKinley on left side face of note. The number panel is below portrait, large denomination counter in upper right corner and smaller denomination counters in upper and lower left corners. On the back is vignette, Female figure, Navy and Merchant Marine. Legend with small denomination counter in center, base of note.

DESCRIPTION OF GENUINE NOTE

On genuine, left end of note, vignette represents Battle of Lexington. Right end, vignette represents Genius of Liberty unfurling American flag, exciting the loyalty of the yeomanry of the nation. Back of note, vignette represents Baptism of Pocahontas. All notes prior to series of 1882 had green border backs; those of 1882 have brown border backs, with charter number of bank in green panel, centre of note, in place of Pocahontas vignette. The series of 1902, face of note, has portrait of Hugh McCulloch, left side, with number panel below portrait. Large denomination counters in upper right and lower left corners, small denomination counter in upper left and small lathe counter in lower right corners. Back of note has vignette, Liberty and Capital, with eagle and shield to left of note.

FIFTIES

DESCRIPTION OF GENUINE NOTE

On genuine, left end of note, vignette represents Gen. Washington crossing the Delaware; above is large "50," crowned by "FIFTY." Right end, vignette represents soldier of the Revolution of 1776 on picket duty; he sees in a vision future glory of his country, typified by Union of Liberty and Justice with Victory, represented by three females in mid-air, with "Victory" crowning whole. Back of note, vignette represents Embarkation of Pilgrims. All notes of this denomination prior to series of 1882 had green border backs; those of 1882 have brown border backs, with charter number of bank in green panel, surrounded with lathe-work, in place of vignette Embarkation of Pilgrims. The series of 1902 has portrait of John Sherman on left side, face of note, number panel below portrait. Large denomination counter in upper right and lower left corners; small denomination counter in lower right corner. On the back there is a vignette, Male figure, with denomination counter, lower left corner, and vignette, Female figure, Engine and Factory scene, right of note.

ONE HUNDREDS

DESCRIPTION OF GENUINE NOTE

On genuine note, left end vignette represents Commodore Perry leaving his flagship "Lawrence;" above is large ornamental "C" and "100." Right end vignette represents angel with coronet, on which is "Liberty," her hands extended towards fasces planted on rock, entwined by wreaths and belts, latter bearing "The" and "Union," at right, "maintain it" in burst of sunlight; whole designed to represent Genius of America invoking aid of heaven to maintain and preserve the Union; above vignette is "100" and "C." Back, vignette represents Declaration of American Independence, July 4, 1776. All notes prior to series of 1882 had green border backs; those of 1882 have brown border backs with charter number of bank in green panel, instead of vignette Declaration of American Independence. The series of 1902, on left side of face of note, has portrait of John J. Knox, with number panel below portrait. Large denomination counter in upper right and lower left corners; small denomination counter in lower right corner. On the back of the note is vignette, two Male figures, eagle, shield and flags in centre of note, with legend and vista of Capitol and Monument at base.

DESCRIPTION OF COUNTERFEITS

State.	City.	Bank.	Check Letter.	Date or Series.	Charter No. of Genuine.
Mass.	Boston	First National	A	Feb. 2, 1864.....	200
		On genuine, vignette, left end, water drops from both sides of bow oar; on counterfeit from only one side. Crossing of letter "T" omitted in "MAINTAIN" on right end of counterfeit. This defect is often mended by reprint, pen or pencil, but not so as to deceive close observers. On the genuine bills the sailor, standing in the bow of the boat, has a medium-sized head and face with a partly opened mouth; on counterfeits the same man has a large, broad head and face, a closed mouth, and broad, full forehead. On the back of the genuine bills the lettering of the several panels is properly punctuated. In the counterfeits the lower panel containing a quotation from the law against counterfeiting, on second line, after the word "IT," a comma is omitted, and after the word "PRINTED" on the fourth line in same panel.			
	Boston	National Revere	A	July 20, 1865.....	1295
		The genuine note has space of 1-16th of an inch between edge of wing of figure of Liberty and shading of letter "C" in upper right corner; on counterfeit about half the distance. On genuine, in vignette, left end, water drops from both sides of bow oar; on counterfeit but from one side. On genuine, distance between wing of figure of Liberty and foot of check-letter A is over 3-16ths of an inch; on counterfeit hardly 1/8 of an inch. On genuine a line drawn sharply under words, "with the U. S. Treasurer at Washington," if extended strikes the lower lip of figure of Liberty; on counterfeit it strikes the chin. Face of sailor in counterfeit, bow of boat, resembles a skeleton or death's head. On the back of the genuine bills, in the upper lettered panel, on the third line, right, the words "OTHER DEBTS" are properly spaced. In the counterfeit the "R" in "OTHER" joins the "D" in "DEBTS," and the "D" is raised above the letters preceding.

Instructive Guides

U. S. Notes of date 1862 and 1863 have no jute or fibre in the paper.

Series of 1869, 1874, 1875 or 1878 are printed on a distinctive fibre paper known as the Wilcox patent.

Series of 1880 are printed on paper having a red and blue silk thread running from end to end, one at the top and the other at the bottom of the note, and shreds of red and blue silk fibre scattered all through the paper, and known as the Crane patent. Then the scattered threads were discontinued, leaving only the parallel threads or one of them. Then, later on, was adopted the new kind of paper, having only the scattered threads localized in two bars, one across each end of bill.

The counterfeits of U. S. Notes, of dates 1862 and 1863, also some of Series 1875, bear the small red seal, pointed (old seal).

Counterfeit 50's and 500's of Series 1869, and some counterfeits of Series 1880 bear the large red seal, lathe work points.

Some 20's and 10's (1880) bear large red seal, plain border.

Few large chocolate seals, lathe work points, are counterfeited on any bills.

Very few National Bank bills bearing red pointed seal have any fibre in paper.

Series of 1875 (all of which have the red scalloped seal) are either printed on jute fibre paper, or the silk line paper, the same as used for the U. S. Notes, Series of 1880.

Series of 1882, bearing the brown scalloped seal, such are also printed on the same silk line paper as the U. S. Notes, Series of 1880.

The check-letters, A, B, C or D, referred to in the body of this *DETECTOR*, are all printed in *black* ink on the face of U. S. Notes and National Bank Bills, as well as on the Bills of the Dominion of Canada. Some U. S. National Banks have been supplied with other letters.

THE NUMBER SYSTEM.

All Government Notes—but not National Bank Bills—are printed of one denomination four on a sheet, and lettered respectively A, B, C or D. Each note also bears a Treasury number, and divide this number or only the last two figures of it by four, and if the remainder is one then the check letter should be A; if two remainder then B; if three remainder then C; and if no remainder then D. If the result shows otherwise then the numbering is wrong, and hence the bill is a counterfeit. Wrong numbering will detect a very large number of the counterfeits in circulation, but some counterfeits, however, are correct.

UNITED STATES NOTES AND CERTIFICATES.

The old issue of United States notes was divided into four series, all of which were signed by L. E. Clittenden as Register and F. E. Spinner as Treasurer. The series of 1869 were signed by John Allison as Register and F. E. Spinner as Treasurer. Of the series of 1875, numerous counterfeits have appeared, from the 1's to the 50's. Notes of this issue are signed by John Allison, Register, and John C. New, A. U. Wyman and Jas. Gilfillan as Treasurers. Of the series of 1878, but two denominations have been counterfeited, the 10's and 20's, and of the series of 1880, the 2's, 5's, 10's, 20's, 50's and 100's.

On both the United States notes and gold and silver certificates there are usually small engraved figures under the check letter. They represent the number of the plate from which the note is printed, and are used as a means of identification of the printers through whose hands the note passed. As many as 60 plates may be used at one time in printing notes of one denomination, and each plate has its own number. The small figures have been printed on all notes since 1862.

No gold certificates have been issued below the denomination of \$10. All certificates are issued and numbered the same as Treasury notes, and are check-lettered in their order on each sheet.

Only three denominations of gold certificates have been counterfeited, the 10's, 20's and 100's.

Six denominations of silver certificates have been counterfeited, the 1's, 2's, 5's, 10's, 20's and 100's.

All U. S. Treasury notes issued prior to 1869 were printed on plain bank note paper. All issued since, commencing with the series of 1869, are printed on fibre paper. Many of the old issues were counterfeited, as the paper used had no special distinctive feature, engraving being mainly relied on by the Government to prevent imitation. As numerous counterfeits appeared on the old issues, the Government was obliged to adopt, in 1869, a special paper, the distinctive feature of which was a narrow localized tint of short blue fibre running the entire length of the sheet in such a manner as not to lessen its strength or interfere with the printing. When examined under the microscope, these fibres have the appearance of coarse black hairs, of different lengths and shapes, scattered promiscuously, regardless of regularity, over the entire surface. This paper is known as the Wilcox patent. In 1878 another feature of fibre paper was adopted, somewhat similar, with two silk threads running lengthwise throughout the note. This is known as the Crane patent.

Dated March 10, 1862.
F. E. Spinner, Treasurer.

New series, and new series 70. Inferior counterfeits. Engraving on face of notes very coarse; vignette statue of Liberty, left end, looks like a cheap wood engraving. Vignette head of Hamilton, right end, coarse, of very poor appearance, and not a likeness. Signature of L. E. Chittenden, Register, engraved in coarse lines, not a fac-simile of genuine. Numbering very poor. Imprint of American Bank Note Co. imperfect. Lathe work around figure 5 on counterfeit and on back of notes defective.

Act of March 2, 1863.
L. E. Chittenden, Register.

A D

Dated March 10, 1863.
F. E. Spinner, Treasurer.

New series 77. Fair counterfeit. Engraving on face of note coarse. Lathe work around figure 5, on counter, right upper corner of bill, very defective. Vignette of Hamilton, right lower corner, though poorly engraved, has a fair expression and likeness. Vignette Statue of Liberty, left end of bill, "scratchy," and unfinished in detail, lacking the cross lines in shading. About feet of statue a few rough lines alone appear, instead of sharply defined folds of drapery shown on genuine. Lathe work back of note faulty, lines not traceable in green tint.

Act of March 3, 1863.
L. E. Chittenden, Register.

A D

Dated March 10, 1863.
F. E. Spinner, Treasurer.

New series 77, and new series. Good counterfeits. Engraving well done; general appearance good. Lettering well engraved and shading regular, yet heavier than genuine. Lathe work around figure 5 on counter, right upper corner face of bill, appears good at first sight, yet when inspected is found to lack very fine continuous lines of genuine. Vignette of Hamilton almost as finely engraved as genuine and presents a very fair likeness. Vignette Statue of Liberty, left end, not so carefully finished; general features of statue and its drapery are discernible, but details are imperfect or wanting. On left hand of the figure (the side toward the body of the note) drapery below knee does not show ornamental ball-tassels as prominent as on genuine. Lathe work back of note defective.

Fair. Most noticeable defects color of Treasury numbers, seal and vignette in lower right corner. Treasury numbers irregular in formation and darker blue than genuine. Small scalloped seal brick-red instead of carmine. Vignette of Columbus presenting America to Europe, Asia and Africa has blurred appearance; folds of coat on Columbus scarcely distinguishable; skirt of Indian girl, particularly fur border at bottom, very plain in genuine, cannot be seen in counterfeit, all being blurred. Lathe work and portrait of Webster good. Lettering has flat appearance, not standing out boldly. Two pieces of paper, between which silk fibre is placed, closely imitating the genuine, but surface is raised over fibre, and may be felt by rubbing the finger over it.

B. K. Bruce, Register.

D

Series 1880.
A. U. Wyman, Treasurer.

Photographic pen and ink counterfeit. General appearance good. Lathe work poor. Portrait of Webster and vignette well done. Imprint at top omitted. Words "Series of," over 1880, upper left corner, omitted, also words "Register of the Treasury" and "Treasurer of the United States," under signatures of B. K. Bruce and A. U. Wyman. Lathe work on back poor; green ink can be removed by moistening. Attempt to imitate fibre paper by printing blue and red lines lengthwise. Large brown spike seal. Several of these counterfeits have check letter D changed to L, and A. U. Wyman to James Gillfillan as Treasurer. No genuine U. S. note has check letter L, as the Government uses only four check letters on U. S. notes: A, B, C, D. Other letters appear on National Bank notes only.

Good counterfeit, excepting slight off-color of red seal, especially large red X with word "Ten" across it. Front and back printed on separate pieces of thin paper, having coarse silk fibre between and pasted together, which makes the bill stiffer than genuine; some bills lack fibre. Delicate lines too heavy. Bill lacks that nice, clean look, with contrast of light work and heavily shaded parts, of genuine. On close examination through a magnifying glass, the engraving of the two lines over large red X, AUTHORIZED BY THE LEGAL TENDER ACTS OF 1862 AND 1863, in counterfeit, appear heavy and letters broken and crooked, while in genuine they are even and clear. Words "Treasurer of the United States," under signature of Ellis H. Roberts, also a poor piece of work, capital "U" in "United" being broken. Below the large words "The United States of America" are horizontal or parallel lines, but such lack cross lines that should be there. The same applies also to background of portraits. Portraits of Lewis and Clark good, also the buffalo. Different numbers appear on different notes. Back of note looks well.

Series 1901.
Chas. H. Treat, Treasurer.

Good lithograph. Silk thread in imitation of fibre. Most noticeable defect is color of ink, which is gray-black instead of brilliant black. Color of numbers and seal good. Lettering of note well done, but portraits of Lewis and Clark and buffalo are scratchy, and do not stand out as clear as in the genuine. Back of buffalo appears as if sun was shining brightly upon it.

Legal Tender Acts of 1862 and 1863.
J. W. Lyons, Register.

B 202

Series 1901.
Ellis H. Roberts, Treasurer.

Dangerous. Lettering very good, lathe work only fair. Portraits of Lewis and Clark, while good, have not lifelike appearance of genuine. In female figure, right end of note, the navel is visible; on genuine it is not. Color of Treasury numbers brown-red instead of earmine-red, and figures not as heavy as genuine. Lathe work at first sight is good, but examination will show it is broken. Head of buffalo appears flat, while in genuine it is natural shape. Back of note good but off color, having a faded tinge. Contains silk fibre, but not as plentiful as the genuine. Note has wax or shiny appearance.

J. W. Lyons, Register.

C 86

Series 1901.
Ellis H. Roberts, Treasurer.

Dangerous. Good quality of paper; no silk fibre, nor imitation of it. Seal and numbers excellent and of good color. Buffalo well done. Large red X well done, but bottom part has dark or blurred appearance. Portraits of Lewis and Clark have not lifelike appearance of genuine. Shading under large words "United States of America," upper part of note, more of a solid black band than line work. Back of note not as well done, darker green than genuine; left arm of female figure not well outlined.

Very dangerous. Printed from engraved plates. Most noticeable defects are in portrait of Hamilton; nose, instead of being round on end, is brought to a sharp point; chin, instead of being double, is square; head, from back of hair to tip of nose, on line of ear, is fraction of inch wider than genuine; work on coat gives flat effect and merges into background in lower part of portrait. In border small figures "20" omitted between XX (thus: X20X). In octagonal ornament under word "Washington," centre face of note, detail is so blurred that little eight-pointed star forming centre of ornament does not stand out in relief as in genuine. Paper of very deceptive character and has distributed fibre.

Series 1880.
E. H. Nebeker, Treasurer.

Woodcut. Portrait of Hamilton poor; small scalloped seal pale pink instead of carmine-red. Treasury number upper right omitted. Imprint "Register of the Treasury" and "Treasurer of the United States," under signature, also omitted. Distributed silk fibre imitated by promiscuous ink lines.

A second issue has appeared with the omissions mentioned above inserted.

FIFTIES

Act of Feb. 25, 1862.
L. E. Chittenden, Register.

C

Series 1. Dated March 10, 1862.
F. E. Spinner, Treasurer.

Inferior. One of "convertible" series. Engraving badly executed. Vignette head of Hamilton defective; nose of portrait runs to an unnatural sharp point and there is a peculiar "dish" to the countenance not seen in genuine. Numbering imperfect.

Act of Feb. 25, 1862.
Patented June 30, 1857.
L. E. Chittenden, Register.

C

Dated March 10, 1862.
New Series 1.
F. E. Spinner, Treasurer.

Dangerous. Engraving of portrait very good. Buttons on Hamilton's coat not as distinct as on genuine. In lower part of figure "0" in large counters "50" on each end of note a white line crosses that figure "0;" in counterfeit it does not. On back, in border, small 50's are inclosed in lines—octagonal—but on lower left end of note two of these octagonal forms lap.

Act of Feb. 25, 1862.
L. E. Chittenden, Register.

A B C D

Series 1. Dated March 10, 1862.
F. E. Spinner, Treasurer.

Altered notes. Very dangerous. Made by raising genuine notes. By error, certain notes 2s and 50s bear same vignette head of Hamilton. On genuine fifties vignette head of Hamilton is at top of note; on the twos and raised note, it is at bottom. Vignette head of Hamilton has often been cut from genuine twos, the back removed and the face neatly cemented over the inferior work of poor counterfeit fifties, which were thus made passable.

Act of March 3, 1863.
L. E. Chittenden, Register.
Patented June 30, 1857 (on upper left of note).

Dated March 10, 1863.
New Series 1.
F. E. Spinner, Treasurer.

Dangerous. Portrait of Hamilton equal to genuine. On genuine, white lines cross lower portion of "0" in large figures "50" in counters on each end. On counterfeit, do not. Buttons on Hamilton's coat indistinct (see description of note below New Series 2).

Act of March 3, 1863.
L. E. Chittenden, Register.
Patented April 28, 1863 (on upper left of note).

A C D

Dated March 10, 1863.
New Series 2.
F. E. Spinner, Treasurer.

One of the most dangerous counterfeits ever issued. Engraving excellent, numbering good, lathe work fair. On genuine, back of note, small 50's in border are surrounded by octagons; on counterfeit they are circles. Two of these circles on lower left end are run together, omitting cipher, which makes figures read 550. Description of New Series 1, preceding, applies to this note. Portrait of Hamilton.

Act of March 3, 1863.
John Allison, Register.

B

Series 1869.
F. E. Spinner, Treasurer

Good. Genuine notes printed on fibre paper, counterfeits on plain paper. Lathe work and numbering good. Portrait of Henry Clay. Genuine have flourish between "Series of" and "1869," upper left corner face, thus:

On the counterfeit it is omitted, thus:

Series 1880.
J. N. Huston, Treasurer.

Excellent pen and ink counterfeit. Words "Act of March 3, 1863," over portrait Benjamin Franklin omitted; also words "Series" over letter "N" in "United States," "Engraved and Printed at the Bureau Engraving and Printing," to left of portrait of Franklin. Color of seal excellent. Parallel silk threads run lengthwise in genuine notes, imitated by drawing fine blue lines and creasing note over lines.

Act of March 3, 1863.
J. Fount Tillman, Register.

C 17

Series 1880.
D. N. Morgan, Treasurer.

Dangerous. Portrait of Franklin very clear, except line of mouth and opening of ear, more pronounced. Small scalloped carmine-red seal closely resembles genuine. Words "Act of March 3, 1863," over portrait of Franklin, also name "Benjamin Franklin," under portrait, the words "Engraved and Printed Bureau Engraving and Printing," to left of portrait of Franklin, and word "Series" over letter "N" in "United States," are omitted on face. Penalty for "Counterfeiting" in panel left end back, words "Series of 1880" in panel in right end back and imprint "Bureau Engraving and Printing, Washington, D. C.," in centre lower border back, are omitted. Paper of good quality, and distributed red and blue silk fibre is cleverly imitated by red and blue ink lines. Other counterfeits are likely to appear, differing in number, seal and check letter, and bearing other signatures.

Series 1869.
F. E. Spinner, Treasurer.

One of most dangerous counterfeits in existence. Engraving and workmanship nearly equal to genuine. Lathe work excellent. Treasury numbers fair and color of ink good. Star on right of Treasury number blurred. Portrait of J. Q. Adams excellent, but lobe of ear is indistinct. In counterfeit, button upon coat, nearest lapel, almost square; in genuine it is round. Vignette of figure Justice finely engraved, except following: As scale is held aloft in left hand, upright holding beam is crooked, and is larger than in genuine; in genuine, upright shows only to lower part of hand, while in counterfeit it shows to second finger from base; white curve in arm is a perfect oval in genuine; in counterfeit it is not. Left foot of vignette, as it extends from garment, presents a clubbed appearance in counterfeit, while toes are short and not one-half length of genuine. Parallel ruling is excellent. Note is printed on fibre paper, signed "John Allison, Register," and "F. E. Spinner, Treasurer." Bankers and others should receive these notes with great care, as it is only by comparison with genuine that majority of experts can positively decide as to genuineness of a note of this class. Nearly all of this issue have been retired by Treasury, very few genuine notes now being in circulation. These notes should be received for collection only.

ONE THOUSANDS

Act of March 3, 1863.
L. E. Chittenden, Register.

A B C D

Dated March 10, 1862, and March 10, 1863.
F. E. Spinner, Treasurer.

Very dangerous. Engraving nearly equal to genuine. A mistake was made in genuine issue under this act, which counterfeiters copied, that of dating notes March 10, 1862, instead of 1863. This error was corrected in a subsequent issue of the genuine. On face of counterfeit lathe work in the border and on corner is much inferior to genuine. On left end of face, in border, words "Act of March 3, 1863," much coarser. Circles of 1,000 surrounding portrait of Morris much more irregular than in genuine. On counterfeit face of Morris is more front view. On genuine eyes cast more to left. Imprint "American Bank Note Co.," on right end of border is much narrower than on genuine. On back of note the four points at each end of note are much more pointed than on genuine. These differences were all noted by comparison with a genuine note of same date and check letter. Very few genuine notes of this denomination and issue are in circulation. Bankers and others are warned to handle these notes with great care.

Counterfeit Treasury Notes

ONES

- Act of July 14, 1890.
B. K. Bruce, Register. **B** Series 1891.
Ellis H. Roberts, Treasurer.
Engraving poor. Very small words scarcely decipherable. Stanton. Scalloped carmine seal off color.
- Act of July 14, 1890.
B. K. Bruce, Register. **B** Series 1891.
Ellis H. Roberts, Treasurer.
Poor; two pieces of paper, pen lines in imitation of silk fibre. Stanton. Small carmine seal.
- Act of July 14, 1890.
J. Fount Tillman, Register. **C** Series 1891.
D. N. Morgan, Treasurer.
Printed from etched plate; will not deceive ordinary handler of money. Portrait of Stanton. Lathe-work and small lettering badly executed. Has distributed fibre, but of poor quality.

TWOS

- Act of July 14, 1890.
W. S. Rosecrans, Register. **A** Series 1890.
E. H. Nebeker, Treasurer.
General appearance good. Most noticeable defect in portrait of McPherson, head being too broad and both eyes too large. Numbering poorly formed and a faded red color. Lathe-work on face good, on back very poor. Has the two parallel silks threads and large spiked chocolate seal.
- Act of July 14, 1890.
J. Fount Tillman, Register. **A** Series 1891.
D. N. Morgan, Treasurer.
A poor counterfeit. Portrait of McPherson very poor. Small scalloped seal. Printed on two pieces of paper, between which are miscellaneous silk threads.
- Act of July 14, 1890.
W. S. Rosecrans, Register. **B** Series 1891.
E. H. Nebeker, Treasurer.
Poor; printed from zinc-etched plate. Portrait of McPherson. Plate and notes captured.
- Act of July 14, 1890.
J. Fount Tillman, Register. **B 5** Series 1891.
D. N. Morgan, Treasurer.
General appearance excellent, except Treasury numbers, which are more of a brown-red than bright carmine-red of genuine. Portrait of General McPherson, while fairly well engraved, appears sunk in background. Geometric lathe-work and parallel ruling poorly executed. Red scalloped seal excellent in workmanship and color. Face and back evidently printed on separate pieces of paper and pasted together, with silk threads between. Quality of thread is very poor; paste caused color of thread to spread in paper, giving impression at first that fibre was imitated by pen and ink scratches.
- Act of July 14, 1890.
J. Fount Tillman, Register. **B 33** Series 1891.
D. N. Morgan, Treasurer.
Poor. Portrait of McPherson too dark and lacks life-likeness; a white streak runs across iris of each eye. Seal dark red instead of light carmine. Numbers have been photographed on plate, and their dark outlines show beneath red ones; color of numbering too dark red, but otherwise good. Lathe-work on face has indistinct, worn look. Ink lines represent silk fibres.
- Act of July 14, 1890.
W. S. Rosecrans, Register. **C** Series 1891.
E. H. Nebeker, Treasurer.
Poor. Treasury numbers heavier and a darker blue than genuine. Portrait of McPherson appears much blurred. Paper poor quality, but has distributed silk fibre.
- Act of July 14, 1890.
J. Fount Tillman, Register. **C 32-34** Series 1891.
D. N. Morgan, Treasurer.
Not a good counterfeit. Printed from photo-etched plates, on soft fibrous paper, into the surface of which a few silk threads have been impressed. Portrait of McPherson lacks life-like appearance; hair and beard has not carefully brushed appearance in genuine. Heavy black lines represent eyebrows; right side of nose obscured by black ink splotch. Lathe-work poor. Small scalloped seal has faded appearance.
- Act of July 14, 1890.
B. K. Bruce, Register. **D 4 B 4** Series 1891.
Ellis H. Roberts, Treasurer.
Most noticeable defect is in portrait of McPherson, which has a staring look, and head appears flat, while in genuine it stands out life-like. Seal dark red instead of bright carmine. Treasury number brick-red, and parallel ruling underneath very poorly imitated. Lathe-work also very poorly imitated. Paper much thinner than genuine, and silk fibre is closely imitated by red and blue pen and ink lines.
- Act of July 14, 1890.
J. Fount Tillman, Register. **D 27 B 28** Series 1891.
D. N. Morgan, Treasurer.
Fair. McPherson portrait lacks life-like appearance; many white spots on face. Treasury numbers good. Seal lighter than genuine. Paper good quality; distributed fibre imitated with pen and ink lines.
A second issue of this counterfeit has appeared bearing check-letter B and plate No. 28.
- Act of July 14, 1890.
J. Fount Tillman, Register. **D 38** Series 1891.
D. N. Morgan, Treasurer.
Poor. Portrait of McPherson and small scalloped seal; word "Bearer" in center face, under "America," spelled "Beurer." Distributed silk fibre imitated by red ink pen scratches.
A second issue of this counterfeit bears check-letter B and plate No. 4.
A third issue has appeared bearing signatures J. Fount Tillman, Register, and D. N. Morgan, Treasurer.

FIVES

- Act of July 14, 1890.
J. Fount Tillman, Register. **A 12** Series 1891.
Portrait of Thomas miserable. Lettering and lathe-work poor. D. N. Morgan, Treasurer.
- Act of July 14, 1890.
W. S. Rosecrans, Register. **A D** Series 1891.
Poor counterfeit. Small carmine-red seal. Portrait of General Thomas badly engraved. E. H. Nebeker, Treasurer.
A second issue of this counterfeit bears the signatures of J. Fount Tillman, Register, and D. N. Morgan, Treasurer. Distributed silk fibre imitated by red and blue ink lines.
- Act of July 14, 1890.
J. Fount Tillman, Register. **D** Series 1891.
Photographic, touched up with pen and brush. Gray background of photography plainly seen. Portrait of General Thomas; small scalloped seal. Distributed fibre imitated with blue and red ink lines. D. N. Morgan, Treasurer.
- Act of July 14, 1890.
J. Fount Tillman, Register. **D 20** Series 1891.
Poor lithographic production, printed on heavy paper, with fibre imitated by ink lines. Bears portrait of Thomas and small scalloped seal. Imprint under signatures inclosed between parallel lines touching top and bottom of letters. A second issue contains silk thread. D. N. Morgan, Treasurer.

TENS

- Act of July 14, 1890.
W. S. Rosecrans, Register. **B** Series 1890.
Poor. Large chocolate spike seal; face has moth-eaten appearance; lathe-work very poor; star on epaulette of Gen. Sheridan four-pointed, should be five. J. N. Huston, Treasurer.
- Act of July 14, 1890.
J. Fount Tillman, Register. **A 2** Series 1891.
Poor counterfeit, printed from woodcut plates of crude workmanship. Portrait of Sheridan. D. N. Morgan, Treasurer.
Printed on two pieces paper, between which silk threads are distributed.
- Act of July 14, 1890.
J. Fount Tillman, Register. **B** Series 1891.
Photographic. In portrait of Sheridan right eye and mustache are hardly visible. Color of Treasury numbers and small scalloped seal maroon, instead of carmine-red. D. N. Morgan, Treasurer.
- Act of July 14, 1890.
W. S. Rosecrans, Register. **B 2** Series 1891.
Pen and ink counterfeit; portrait of Sheridan. Most noticeable defect in mustache and chin whiskers, which appear smoothly brushed, while in genuine they are straggling and bushy. Imprint "Bureau Engraving and Printing," left end face and back, missing; also words "This note is a legal tender," etc., etc., in centre panel back; in their stead is an X. Small scalloped carmine-red seal. E. H. Nebeker, Treasurer.
- Act of July 14, 1890.
J. Fount Tillman, Register. **C** Series 1891.
Poor photograph. Portrait of Sheridan. No attempt to color Treasury numbers, seal or back. D. N. Morgan, Treasurer.
- Act of July 14, 1890.
J. Fount Tillman, Register. **C** Series 1891.
Apparently printed from photo-etched plate, on two pieces of paper, between which silk threads are distributed. So poor, detailed description unnecessary. Small scalloped seal. Portrait of Sheridan. D. N. Morgan, Treasurer.
- Act of July 14, 1890.
J. Fount Tillman, Register. **C 18** Series 1891.
Good. Most noticeable defects in portrait of Sheridan, which does not stand out as in genuine; right end of forehead and right cheek in counterfeit a mass of white patches, while in genuine it is dotted lines, called stipple work. Lathe-work in upper left corner, surrounding letter X, very good, also lettering generally on face; lathe-work surrounding figure 10, in upper right corner, not so well done, lines broken and indistinct. Two pieces paper, between which silk threads are distributed to imitate fibre. D. N. Morgan, Treasurer.

TWENTIES

- Act of July 14, 1890.
W. S. Rosecrans, Register. **A** Series 1890.
Excellent photographic pen and ink counterfeit. Portrait Chief Justice Marshall appears broader than in genuine. Words "Series of 1890," under Treasury numbers, upper right corner, omitted; also in print "Bureau Engraving and Printing," left of portrait. Small scalloped carmine-red seal, color closely resembles genuine. Parallel silk threads imitated by creasing and drawing lines over crease lengthwise of note. Notes of this issue and series are likely to appear differing in check-letter and seal. E. H. Nebeker, Treasurer.

ONE HUNDREDS

- Act of March 3, 1863.
W. S. Rosecrans, Register. **A B C D** Series 1890.
Dangerous photographic pen and ink counterfeit. In portrait of Farragut, nose appears longer and upper lip extends outward, while in genuine latter appears drawn in, giving determined expression. J. N. Huston, Treasurer.
Imprint "Bureau Engraving and Printing," in border, right end, missing. Lathe-work surrounding large 100 poor; color of large spiked chocolate seal good. Imprint "Bureau Engraving and Printing," bottom centre of note, missing.

B 2753

Series 1886.
J. N. Huston, Treasurer.

Has washed appearance. Work on face almost perfect. Numbers black, should be blue. Large spiked seal purple color. Back a bluish cast in color, and poorly executed. Martha Washington.

Act of Aug. 4, 1886.
W. S. Rosecrans, Register.

D 1763

Series 1886.
James W. Hyatt, Treasurer.

General appearance fair; color of Treasury numbers good; ruling under Treasury numbers not strictly parallel; bust of Martha Washington has blurred look, white patches appearing on forehead and right side of face. In notch of key in counterfeit is letter **T**, while in genuine it takes the shape of **T**. Words "Treasurer of the United States" under signature James W. Hyatt, badly and irregularly printed. Entire face lighter than genuine. Back excellent. No parallel silk threads. Small round red seal.

Act of Aug. 4, 1886.
J. Fount Tillman, Register.

A 16

Series 1891.
D. N. Morgan, Treasurer.

Fair photo-etched plate. Bust of Martha Washington has blurred look. Treasury numbers of good color, but heavier faced than genuine. Small scalloped carmine-red seal good both in color and design. Back blurred and a darker green than genuine. Printed on distributed fibre paper, but of poor quality.

Act of Aug. 4, 1886.
W. S. Rosecrans, Register.

D

Series 1891.
E. H. Nebcker, Treasurer.

Poor. Portrait of Martha Washington and face of note has blurred appearance. Scalloped seal.

Act of Aug. 4, 1886.

C 34 D

Series 1896.
Ellis H. Roberts, Treasurer.

Poor. Small red seal. Treasury number, also seal, blurs when rubbed. Black printing on face very black; all fine lines lost in printing; no silk fibre. *A second issue bears check-letter D 89, and the Treasury number will not blur when rubbed.* Portrait of Martha Washington.

Act of Aug. 4, 1886.
J. W. Lyons, Register.

C

Series 1899.
Ellis H. Roberts, Treasurer.

Poorly etched counterfeit, printed on good paper; no distributed fibre. Numbering poor. Back of note printed upside down. Eagle and small portraits of Lincoln and Grant.

Act of Aug. 4, 1886.
J. W. Lyons, Register.

C

Series 1899.
Ellis H. Roberts, Treasurer.

Rough photo-etched plates; two thin sheets of paper with ink lines on inside of sheets to imitate threads. Stars over eagle blurred. All lathe-work and portraits indistinct. Back of note dirty green; lathe-work very rough. Eagle and small portraits of Lincoln and Grant.

J. W. Lyons, Register.

D 1601 C 1661

Series 1899.
Ellis H. Roberts, Treasurer.

Poor. American eagle and small portraits of Lincoln and Grant indistinct and blurred. The figure "1" and scalloped seal in blue closely resemble soiled genuine notes. Two pieces of paper, fibre closely imitated with ink. Right end bears check-letter C, left end check-letter resembles a D upside down.

TWOS

(No check-letter.)

Poor; printed from wood-cut; no resemblance to any issue of silver certificates. Has spread eagle on right end, face, and two Indians on left end, one standing, other kneeling. Has square green back, with word "Silver" in white capitals in centre. Very crude.

Act of Aug. 4, 1886.
W. S. Rosecrans, Register.

A 1865

Series 1886.
C. N. Jordan, Treasurer.

Fair. Treasury numbers fairly printed, good color. Upper right, parallel lines, where Treasury numbers are printed, are omitted. Portrait of Hancock coarse. Small seal pink; paper has harsh feeling.

Act of Aug. 4, 1886.
W. S. Rosecrans, Register.

B 1863

Series 1886.
James W. Hyatt, Treasurer.

Large round spiked seal bright brick red, instead of dark red. Most noticeable defects in portrait of Gen. Hancock; no cross lines in left breast of coat in counterfeit, all lines being parallel. Treasury numbers very dark blue, instead of ultramarine blue. Figures in numbers vary in size. Geometrical lathe-work surrounding large figure 2 in upper right corner well executed. No attempt to imitate silk threads running lengthwise; some, however, are heavily creased in imitation of silk threads. A second issue of this counterfeit has large chocolate-colored spiked seal, and some notes have the silk threads imitated by red and blue lines.

Act of Aug. 4, 1886.
W. S. Rosecrans, Register.

C 1857

Series 1886.
James W. Hyatt, Treasurer.

General appearance very bad; vignette of Gen. Hancock exceptionally poor, background scratchy. In counter, upper right corner of face, containing figure "2," geometric lathe-work not discernible. Check letter "C," next to vignette of Hancock, indistinct, and omitted altogether on right end. Lathe-work on back very poor. Words "Bureau of Engraving and Printing," in small panel, lower centre of back, can hardly be deciphered. Small round red seal.

Act of Aug. 4, 1886.
W. S. Rosecrans, Register.

C 1858

Series 1886.
C. N. Jordan, Treasurer.

Dangerous. Treasury numbers well done, but figures not as heavy as genuine. Portrait of Gen. Hancock well engraved, also geometrical lathe-work and parallel ruling. In upper left and lower right corner in figure 2 of genuine is engraved in three places word "TWO." A good microscope shows that in ball of 2 letters "OWT" are engraved, but this defect would not be discovered except with powerful glass. Has small round carmine seal. Silk threads running lengthwise missing, but notes are heavily creased to imitate them. A second issue has appeared with silk threads actually running through paper.

Act of Aug. 4, 1886.
W. S. Rosecrans, Register.

Poor; photographic. Large spiked chocolate seal. Creased to imitate parallel silk threads. Hancock.

Act of Aug. 4, 1886.
W. S. Rosecrans, Register.

D 2235

Series 1886.
James W. Hyatt, Treasurer.

Very dangerous. Check letter B, plate number 2235. Treasury numbers very good. Portrait of Gen. Hancock well engraved, but hair and mustache do not appear brushed as smooth as in genuine; star on right shoulder imperfect. Color of large spiked seal good, but a shade lighter than genuine. In upper left and lower right corner in figure 2 of genuine word "TWO" is engraved in three places. A good microscope shows that in ball of the 2 on counterfeit the letters "OWT" are engraved, but this defect is revealed only by a strong glass. In words "United," in "Treasurer of the United States," under signature of James W. Hyatt, "i" and "t" extend a little below other letters. Top of upper loop of "J" in "James W. Hyatt" is directly under letter "D" in "D. C." in counterfeit, while in genuine it comes between "D" and "C." This point, however, does not apply to counterfeit on B1863 and C1857, also bearing signature of James W. Hyatt. The silk fibre imitated by drawing fine blue lines through the body. Back is exceedingly well executed. A second issue has appeared with two parallel silk threads actually in the paper.

A third issue has appeared with error of word Two, mentioned above, corrected.

A fourth issue has appeared, differing from previous three issues only in that it has small carmine red seal.

A fifth issue has appeared, differing from previous four issues only in that it has large spiked chocolate-colored seal.

Act of Aug. 4, 1886.

B 14

Series 1891.
E. H. Nebeker, Treasurer.

Dangerous. Portrait of William Windom almost perfect; eyes appear to have a staring look, especially right eye; upper lip appears a little swollen. Color of Treasury numbers and small scalloped seal excellent. These counterfeits all bears seven figures in Treasury number. Contains distributed silk fibre, thicker and darker red and blue than in genuine. Paper not as good as genuine.

Act of Aug. 4, 1886.
W. S. Rosecrans, Register.

C 13

Series 1891.
E. H. Nebeker, Treasurer.

Wood-cut. Portrait of William Windom coarsely engraved. Cheeks appear sunken and chin out of proportion. Name of Rosecrans spelled "Roseerans." Register begins with B; Treasurer spelled "Treasurero;" many errors on back. Small scalloped seal, brick red, instead of carmine red.

Act of Aug. 4, 1886.
J. Fount Tillman, Register.

C 19

Series 1891.
D. N. Morgan, Treasurer.

Dangerous. Most distinguished defect absence of pronounced white circles around pupils of eyes in portrait of William Windom. Roll of lapel of coat, left of portrait, less clearly depicted than in genuine. Treasury numbers a trifle brighter in color than genuine and not in line. Seal decided pink instead of bright carmine, blurred in appearance. Shading around head in Windom portrait heavier, and very heavy shading occurs over eyes and under nose and chin. Paper of excellent quality, has silk fibre, but thread slightly coarser and red silk darker than in genuine. Back almost perfect, but geometrical work somewhat blurred, in star around small "2" under large "2" on right, four half round shadings making points are scarcely perceptible, while very prominent in genuine.

Counterfeits bearing other Treasury numbers than above mentioned are in circulation, numbers being almost perfect and equal in size. Seal also closely resembles genuine in color.

Act of Aug. 4, 1886.
J. Fount Tillman, Register.

C 41

Series 1891.
D. N. Morgan, Treasurer.

Photo-wood engraving. Portrait of Windom lacks life-like expression. Lathe-work on face and back poor. Color of Treasury numbers good. Back much lighter green than genuine. Small scalloped carmine red seal.

Act of Aug. 4, 1886.
J. Fount Tillman, Register.

General appearance excellent; color of Treasury numbers and small red round seal good; notch of key in seal is simply a perpendicular line, while in genuine takes the shape of T. Portrait of Grant has a scratchy, soiled look—two white patches appear on lower lip, near left corner of mouth; otherwise, engraving and printing very fair. Paper lighter than genuine, no parallel silk threads.

Deceptive pen and ink counterfeit. No check letter in upper left and lower right face of note. Words "This certifies that there has been deposited in the Treasury of the" in upper border above "United States," omitted, also "Silver Certificate," lower border left and right end, also imprint "Register of the Treasury" and "Treasurer of the United States" under signatures of J. W. Lyons and Chas. H. Treat. Blue Treasury number of note will blur when rubbed. Back of note, words "Silver Certificate" in upper border are missing, and on genuine note surrounding numeral "V" in centre are three lines of reading matter giving the status of the note, but on counterfeit only one line, and that illegible. Paper fair; fibre cleverly imitated with pen and ink. Portrait of Indian.

Good. Portrait "Onepapa." Most noticeable defect is the portrait, which appears much darker than and does not stand out nor have the life-like appearance of genuine. Color of seal, numeral "V" and word "FIVE" over the numeral in counterfeit lighter blue than genuine. Horizontal stroke in middle of stop at end of Treasury number, in counterfeit, is an elongated diamond in shape; in genuine, stroke is shaped like upper part of an exclamation point placed horizontally. Dangerous photomechanical production. Printed on two pieces of paper, with distributed silk fibre between them in imitation of genuine. Face plate number 652; back plate number 493. Portrait of "Onepapa." Seal, denominational design, and serial number, all lighter than genuine in color. Word "treasurer," under signature of Roberts, badly printed and letters imperfectly formed. The fine cross-hatching in background of portrait of "Onepapa" is only suggested in counterfeit, where these lines appear coarse and badly broken. The lines forming shading of the blue denominational figure on left of note are thicker than genuine and much broken. On back of note the words "this certificate is receivable, etc.," very badly reproduced, lines broken and letters imperfectly formed. Word "five," back of note immediately to the right of the panel containing the words "United States of America," is very imperfectly reproduced. Shading under the words "United States of America" in counterfeit irregular in formation, with lines running all the way from dark shading to bottom of panel. Color of back nearly approximates that of genuine, being a trifle darker.

Photo-etched, on good paper with ink lines for silk threads. Does not have brilliant looking new inks and paper, but like an old bill has dull black and colored inks and a yellow-white paper. Blue ink too light. On head-gear of Indian is a mass of small dots, not like genuine, fine white feather work. Under large words "United States" there is not the band of solid black shading with further shading below it, but it is run together and irregular. Lower left corner "Series of 1899" looks larger, too prominent and too dark, like white letters in a black panel. Back has too light green ink, and all lathe-work badly broken up.

Very dangerous. Face apparently a photographic platinum print. Face and back plate numbers indistinct or missing. General effect very closely approximates genuine. Color of seal, denominational design and numbers darker than genuine, seal being particularly bad and suggesting brush work. The last three letters of "bearer," the word "on" and the first two letters of "demand" in script, right face of note, appear to have been placed on with a pen or brush. Back of note deceptive, but blue-green and darker than genuine. Note is particularly deceptive from the fact that it is printed on genuine paper, obtained by bleaching a note of smaller denomination. In bleaching the note the color has been taken out of some of the distributed silk fibre lying close to the surface, but the deeply imbedded fibre is still visible in the paper, though the blue has been changed to a purple and the red somewhat lightened.

Dangerous photomechanical production. One piece of heavy bond paper of good quality. Portrait of "Onepapa." A defect in plate gives to Indian chief a cross-eyed expression. Blue seal closely approximates genuine in color but badly printed, being rough and coarse with many broken lines. Blue ink of seal and numbers lacks metallic gloss of genuine. In "stop" at right end of number (upper right face of note) small blue triangles which are so sharply defined and perfectly formed in genuine, are rounded at corners. This is true, but to a less extent, with reference to "stop" in number on lower left face of note. Back of note is a very deceptive piece of work, and except for being a little lighter, closely approximates genuine in color. No attempt to imitate distributed fibre. Back plate number 666.

Face of note very heavy black, and that part of script lettering that crosses blue seal and denominational character has apparently been filled in by hand, and very poorly done. The "e" in "demand" not formed well. Second "e" in "bearer", instead of being loop "e", is like reverse figure "3." The "b" in "payable" looks more like an "l" than a "b." Fine hair lines forming a double line inside large figures "5" on both face and back, as well as letter "V" in centre back of note, missing. Top of large figure "5", upper left end of back, bulges upward instead of being concave, making it much thicker than genuine.

Fair. Most noticeable defect is silver-gray color of black ink, while genuine is jet black. Also seal on counterfeit is lighter red than genuine. Words "Bureau Engraving and Printing," above Treasury number lower left end of note, missing. Comma after "Washington" and period between "D" and "C" in "Washington, D. C.," under portrait, missing. Face of Hendricks on counterfeit not as full as on genuine, and nose appears larger. Treasury number on counterfeit is excellent color, but figures not quite so heavy. Counterfeit on two pieces of paper with silk thread between.

A very dangerous counterfeit. Most noticeable defect is in portrait. In genuine, Monroe represented as having pronounced cheek bones, one on left side of face being particularly prominent, while in counterfeit left cheek bone is missing, making face appear narrower than in genuine, and giving counterfeit different expression. In genuine right ear plainly parts hair, which is brushed upward in front and back of ear, while in counterfeit hair hides top of ear, and is not brushed upward. In name "James" under portrait letters "J" and "A" are not uniform with rest of letters, and bottom of "J" has more of upward loop than in genuine. Geometric lathe work, lettering, numbering and parallel ruling in panel in which Treasury numbers appear are almost equal to genuine, but a critical examination will show parallel lines to be somewhat broken, particularly in lower left border. Treasury numbers are almost perfect, both in color and formation, but the figure 5 in the Treasury number is different, the space within lower loop being oblong, up and down, instead of being round, and space below top line of 5 is too narrow. One of the best points is the top button of waistcoat; this counterfeit top button has lines on it up and down only, and they show well and distinct, while genuine top button alone is cross lined (lines up and down and crosswise also), but these lines are delicate, and by wear, bad printing, dirt, etc., they may thus be wanting or overlooked. Geometrical lathe work and lettering on back of note to the naked eye appears as good as genuine. Back plate No. 2.

Face plate number 7. Portrait of Hillegas. Photo-mechanical production on two pieces of paper with distributed red and blue silk fibre, much finer and more hair-like than genuine. Color of seal, denominational "X" and back all darker than genuine. Portrait of Hillegas is poorly executed. In upper-border design on face of genuine, under line "This certifies there have been deposited in the Treasury of the" there is an ornamental arc finished at each end by a scroll. In genuine this arc is about 1-16th of an inch wide, is marked by a series of distinct and regular perpendicular lines. In counterfeit this arc looks as if it had been executed with a pen, is blurred and scratched, and individuality of perpendicular lines almost disappears. General effect of back, aside from the darker color, better than face, but close inspection discloses work so inferior that it cannot be mistaken as genuine.

A good counterfeit. Bears the Treasury numbers C424363 and C324369, and no doubt bear other numbers. The color of these numbers is good, but not the bright ultramarine blue of the genuine. The portrait of Benton does not stand out in bold relief and lifelikeness as does the genuine. The lathe work surrounding the denomination 100 in upper right of note is flat, broken and has blurred appearance. Lettering on note good, except imprint under signatures of Lyons and Roberts, which is poor. Color of the word "GOLD" on face of note is unlike that on genuine, and color of the back, instead of the bronze-yellow on the genuine, the counterfeit is a light salmon color. Counterfeit has the silk distributed fibre imitated cleverly with pen and ink scratches, and by holding note between the light and the eyes the absence of silk fibre will be noted. On genuine in script line at top of note in the word "deposited" the "i" is distinctly dotted; in counterfeit it is not.

While we speak of the color of the yellow (gold) ink on the gold certificates being off color, etc., it is a fact that the Government so far has been unable to procure an ink that will stand climatic changes, etc.

Counterfeits of Interest-Bearing Notes and Bonds

\$10 Compound Interest Treasury Note. Letter C. Act of June 30, 1864—October 15th, 1864. Signed S. B. Colby, Register, and F. E. Spinner, Treasurer. Number 198380. Photograph of the brownish color of old fading photographic work. Figure of woman. Vignette of Chase.

\$50 Compound Interest Treasury Note. Series 1864. Letter C. Date July 15, 1864. Act June 30, 1864. Signed L. E. Chittenden, Register, and F. E. Spinner, Treasurer. The portrait and vignette of Hamilton a poor quality of work, and the numbers also are poorly done. Plates captured in July, 1866.

\$50 Compound Interest Treasury Note. Check Letter D. Date, December, 1864. Act June 30, 1864. Signed S. B. Colby, Register, and F. E. Spinner, Treasurer. A poor counterfeit. Portrait of Hamilton.

\$50 Compound Interest Treasury Note. Series 1865. Letter D. Date May 15, 1865. Act June 30, 1864. Plates captured July, 1866.

\$50 Series 1865. Letter C. Date July 15, 1865. Act March 3, 1865. Signed S. B. Colby, Register, and F. E. Spinner, Treasurer. Eagle vignette. Interest 7-30, and notes convertible after three years into 5-20 bonds. Plates captured in April, 1866.

\$100 The words "Compound Interest Treasury Note" appear lengthwise of face of note and printed in big gold letters. The note is Series 1865; check-letter B; date May 15, 1865; act June 30, 1864; payable three years from date; and signed S. B. Colby, Register, and F. E. Spinner, Treasurer. The portrait of Washington and the vignette on the left end of note are both good work, the counterfeit plate having been engraved by Charles H. Smith, as he confessed, while the back of note is a genuine impression or from an electrotype plate taken from a stolen impression of the genuine plate. The red numbers, however, are off color, and the figures uneven; and the large "U" in "United States" quite touches the outside line of the medallion in the upper left corner of the face of note; and the last "S" in "States" is distant not 1-16 of an inch from the outside line of the right corner medallion, while in genuine it is about 1-8 of an inch.

\$1000 United States Coupon Bonds. Series of 1861. Acts of July 17, 1861, and August 5, 1861. Mature June 30, 1881 (Sixes of 1881). Portrait of Chase. Exceedingly dangerous counterfeits. Those seen bear only coupons maturing January 1, 1881. On counterfeit, in the \$1000 counter, on nine sections, on each side of portrait of Chase, in the section to the left of the lower half of "1" in "1000," the letter "S" in "State" is entire, while on genuine only the upper half of the "S" is seen. The hair line around portrait on counterfeit shows a break of 1-16 of an inch, but the genuine does not, it is to the right of letter "S" in "Register's." Counterfeit differs from genuine in the mitering of the four corners of the green border. In title "United States of America" in the ruled shade on left side of bottom spur of letter "U" on counterfeit are seven very short lines forming very slight shade under that part of the letter—on genuine are ten lines, each about 1-16 of an inch long and forming a shade of same width as that at the bottom of the letter. Engraved signature at lower right hand of counterfeit and printed in grayish colored ink, is traced over with pen and ink—signature on genuine is written.

\$1000 7-30 Bonds. Letter B. Dated June 15, 1865. Act of March 3, 1865. Signed S. B. Colby, Register, and F. E. Spinner, Treasurer. Very dangerous counterfeit. Bonds matured and interest ceased. The Treasury Department redeemed many of them from Jay Cooke & Co. before the bonds were discovered to be counterfeit. The Department redeemed \$90,000 of the bogus bonds. Charles H. Smith stated that he engraved the plates.

\$1000 5-20 Coupon Bonds of 1862. Consols of 1867. Fourth series; act February 25, 1862; date May 1, 1862. One of the best specimens of counterfeit work that was ever made. It is believed that no printing was ever done from the plates. They were not quite completed when captured on November 21, 1867.

The Different Methods of Counterfeiting Coin

Coins of all kinds and denominations have been counterfeited. The most dangerous counterfeits are those struck from a die, and are usually imitations of gold coins. Molds of various kinds are extensively used in counterfeiting, but counterfeits so made are much inferior to those made with a die. They have a fine appearance, lettering and milling being sharp and clear, and the ring usually good, in some instances almost perfect fac similes of genuine. They are usually a trifle short weight, however, and the edges or reeding not so sharp and clear as in genuine. Many of these coins are full weight. In counterfeits made from a mold, lettering, milling and reeding are usually poor, weight very defective, the coins lack the sharp and clear-cut appearance of genuine coin. Most counterfeit silver coins in circulation are made from molds, as it is an inexpensive form of counterfeiting. Some fair specimens have been produced in this way, but usually they are much lighter than the genuine, and if of required weight, differ in diameter or thickness.

Various metals are used by counterfeiters, principally platinum, silver, copper, brass, antimony, aluminum, zinc, type metal, lead and their numerous compositions.

Among the most dangerous counterfeits of gold coin are those of a composition of gold, silver and copper. They are a low grade gold, and the acid test shows they lack the fineness of standard gold used by the U. S. Mint, which is 900 fine, or 21.19 carats. These counterfeits average from 400 to 800 fine. Platinum counterfeits are dangerous, as the metal used gives required weight, and they are heavily gold-plated. When they have been in circulation for a time the plating wears off, especially on the edges.

The most dangerous counterfeit of silver coin is made of a composition of antimony and lead, the former metal predominating. These counterfeits are of the dollar, have a fine appearance, are heavily silver-plated, with fair ring; some are only slightly below the standard weight. Some pieces among the smaller coins are made of brass, struck from a die, and when heavily plated are fair imitations. They lack required weight, except in a few instances. Counterfeits of type metal, lead and other compositions are much lighter than genuine, those having required weight are much too thick.

Genuine coins of all kinds, for the sake of gain, are tampered with in various ways. These operations are confined almost exclusively to gold coins, which are sweated, plugged and filled.

Sweating is removing a portion of the gold from surface of coin. The process does not interfere with the ring, and as portion removed is generally slight, the coin is left with a very fair appearance, weight only being defective. The principal methods of sweating are the acid bath, filing the edges or reeding, the operator finding a profit in the small quantities of gold removed from numerous pieces. The average reduction in value of coins subjected to these processes is from 1-20 to 1-10.

Plugging is done by boring holes in the coin, extracting the gold, and filling cavity with a cheaper material. The larger coins—double eagles and eagles (\$20 and \$10 pieces)—are used for this purpose. Holes are bored into the coin from the edge or reeding, the gold extracted and cavity filled with a base metal. The small surface of the plugging material, where it shows on the edge of the coin, is covered with gold and reeding retouched with a file or machine. The average loss in value to coins treated in this way is from one-eighth to one-sixth. Coins of this kind are very dangerous, as they are perfect in appearance, the edges only having been tampered with.

Filling is most commonly done by sawing the coin through from the edge or reeding, removing the interior portion, and replacing it with a cheap metal. Coins of all denominations, from quarter eagle to double eagle, are subjected to the process. When platinum is used to replace gold extracted, the coin has same weight as genuine. By this process coins lose four-fifths of their value, as the original surfaces are left only of paper thickness. When edges have been covered with gold and reeding restored, the coin has the appearance of being genuine, having correct size and weight, and a fair ring. Sometimes the covering of gold on edges is so thin that filling can be distinctly seen. When other and less costly filling than platinum is used, coins are of light weight and have a bad ring. If of correct weight they are too thick. Another method of filling is sawing the coin partly in two from edge or reeding on one side, leaving a thin and thick portion. The thin side of the coin is turned back and the gold extracted from centre of thicker portion. The cavity is filled with base metal and sides pressed back into original position and soldered or brazed together. It is difficult to give average loss to coins treated in this manner as hardly any two seen have same amount of gold taken from them.

For detecting counterfeit coin, compare impress, size, weight, ring and general appearance with genuine coin of same period and coinage. The three tests of *weight, diameter and thickness should be applied, for it is almost impossible for the counterfeiter to comply with these three tests without using genuine metal.* Following we give a complete list and a thorough description of the most dangerous counterfeits known to be in existence, with means of their detection.

Counterfeit Gold Coin

DOUBLE EAGLE—\$20.

Authorized to be coined by Act of March 3, 1849. Weight of genuine Double Eagle is 516 grains, is 900 fine, and 21.19 carats.

- 1850.—Weighs 360 grains, fineness gold, 571; silver, 85; copper, 344, and 13.22 carats, value \$8.83. Lighter in appearance, and thicker than genuine. Reeding and milling defective.
- 1851.—Weighs 473 grains, or 43 grains light. Color is bad; reeding and milling defective. Portrait of head of Liberty smaller than genuine. Bears no mint mark. Is struck from a die.
- 1878.—Fair counterfeit, made of type metal, gold plated. Weight 372 grains, being 144 grains light.
- 1880.—Composed of type metal, gold plated, and exceedingly light, weighing about 296 grains—220 grains light. Ring defective. Reeding and milling poorly done.
- 1884.—Has a fair appearance; mint mark S. Color not good; diameter larger than genuine. Milling and reeding fair. Several grains lighter than genuine.

EAGLE—\$10.

Authorized to be coined by Act of April 2, 1792. Weight of genuine Eagle is 258 grains, 900 fine, and 21.19 carats.

- 1841.—Weighs 236 grains, has O mint mark, and is 22 grains light. Coins struck from this die have fine appearance, main defects in reeding and milling.
- 1847.—Weighs 252 grains, has O mint mark, exceedingly dangerous, only 6 grains lighter and trifle thicker than genuine; reeding and milling slightly defective.
- 1849.—Weighs 228 grains, being 30 grains light, composed of gold, silver and copper. Has fair appearance, but is trifle thicker than genuine.
- 1852.—Composed of gold, copper and brass, weighs 181½ grains, or 76½ grains light. Ring is bad. Reeding and milling defective.
- 1855.—Composed of platinum; weighs 265 grains, or 7 grains heavier than genuine; has a fine appearance. Ring defective, diameter trifle greater than genuine. As these coins are gilded, or gold plated, slight wear removes plating from edges, and exposes platinum, or white metal underneath. Other coins of this date have been seen, weighing more than above described coin.
- 1858.—Very dangerous. Composed of platinum, and heavily gold plated. Milling and reeding fairly executed. Diameter, thickness and weight same as genuine. When coin is worn platinum shows distinctly on edges. Ring excellent.
- 1861.—New counterfeit composed of aluminum, heavily gold plated, weighs 154 grains, or 104 grains light; readily detected by general appearance and extreme lightness.
- 1865.—Dangerous. New Orleans mint letter O. Gold fineness is 494; weight .44 of an ounce, giving value 4.49. Contains small proportion of silver, alloy being entirely copper. Mint at New Orleans not opened at that date.
- 1871.—New counterfeit, weighs 186 grains, or 72 grains light, imperfect ring. Milling and reeding poor. Point of arrow in left claw of eagle touches letter "A" in "America," and olive branch touches letter "U" in word "United." Mint letter S touches right claw of eagle.
- 1875. } These counterfeits composed of aluminum, heavily gold plated; weigh 145 grains,
- 1879. } or 113 grains light. They bear the S mint mark, have good appearance, but are
- 1880. } easily detected owing to light weight.

- 1883. } Composed of gold, copper and brass. Made in a mold. Impression exceedingly
- 1891. } poor, particularly of reverse. Weighs 197 grains, or 61 grains light. The reeding
- 1893. } and milling very defective.
- 1899. }
- 1882.—Dangerous counterfeit. Composed of gold, silver and brass. Struck from a die. Weighs 192 grains, or 66 grains light. Value about \$3.60. Reeding, milling and ring very good.
- 1882.—Made in a mold of base metal and plated.
- 1891. }
- 1893. } Composed of brass and heavily gold plated. Weighs 134½ grains, or 123½ grains
- 1895. } light. Obverse finely struck. Reeding and milling well executed. Ring good.
- 1904.—Good counterfeit. Light weight. Off color.

HALF EAGLE—\$5.

Authorized to be coined by Act of April 2, 1792. Weight of genuine Half Eagle 129 grains, 900 fine, 21.19 carats.

- 1800.—Of old coinage, poor, weighs but 81 grains; genuine of this date weighs 135 grains.
- 1803.—Same description as the above, weighs but 83 grains, being 52 grains light.

- 1821.—Larger in diameter, and thicker than genuine. Head of Liberty chin very long; letter "U" in "United States" reversed. 8 grains light, value about one-half.
- 1838.—Excellent; weight, 125 grains; fineness, 547; trifle thicker than genuine; milling and reeding imperfect; value, \$2.70.
1837. } These counterfeits are made in a mold, and are mainly composed of brass and
1339. } copper. Obverse and reverse extremely poor. Weight is from 75 to 95 grains,
1843. } easily detected.
1844. }
- 1844.—Very dangerous, made of platinum, heavily gold plated; diameter, thickness and weight same as genuine. Ring excellent. When worn platinum shows through plating, especially on edges.
- 1844.—Very dangerous. Assay gave following results: One-tenth grain light; specific gravity, 15.9; thickness, about like genuine; fineness gold, 805½; silver, 23; value gold, \$4.47, say, \$4.50; resists acid tests almost as well as genuine; reeding faulty, but very fair; color very good, a trifle yellowish.
- 1845.—Good; weighs 113 grains, composed of gold, brass and copper. Specific gravity, 12.80; should be 17.20. Valued, upon being assayed at mint, at \$3.30.
- 1845.—Dangerous; 780 fine, trifle off color, little thicker than genuine. Composed of gold and brass. Upon being assayed value proved to be \$4.25.

- 1853.—Weighs 121 grains, specific gravity 14, fineness 630. Has brassy appearance, reeding and milling imperfect. Assay value, \$3.28.
- 1855.—Weighs 122 grains, 7 grains light. Imperfect ring; thicker than the genuine.
- 1855.—In all respects similar to preceding, except it weighs 131 grains.
- 1856.—Dangerous; weight and thickness almost identical with genuine; diameter trifle greater. Milling and reeding defective.
- 1857.—Is 450 fine, trifle thicker than genuine; same appearance as coins of 1851, 1855 and 1858. Assay value, \$3.28.
- 1858.—Weighs 115 grains, 14 grains light. Supposed to have been struck from same die as two preceding ones, 1851 and 1855, dates having been changed. Excellent appearance, very good counterfeit, but trifle thicker than genuine.
- 1860.—Excellent; S mint mark; weighs 125 grains; 790 fine; has coppery appearance; reeding very good; milling defective; value, \$4.30.
- 1861.—Cast in a mold; made in imitation of coinage of Philadelphia mint. Plating thin, weight light, but a well cast piece.

- 1900.—Weighs 76 grains. Made in a mold. Not likely to deceive.

THREE-DOLLAR PIECE—\$3.

Authorized to be coined, Act of February 21, 1853. Weight, 77.4 grains; fineness, 900. Deviation in weight allowed in coinage, .25 of a grain. Deviation in fineness allowed in assay, .001; lowest, .899; highest, .901. Coinage commenced, 1854. Coinage discontinued, Act of September 26, 1890. Total amount coined, \$1,619,376.

COUNTERFEITS OF THE THREE-DOLLAR PIECE.

The coinage of three-dollar pieces has been, as may be noted, quite limited, yet this denomination of gold coin has been considerably counterfeited, the false coin being struck in a die from base metal, and so perfectly executed as to be dangerous. In color this counterfeit is a close imitation of standard gold, and a careful comparison of the general appearance and device of the false piece with that of the genuine coin is necessary to detect the difference between them. Genuine three-dollar pieces are sometimes swedged with fraudulent intent between plates of copper until of the diameter of the half eagle, when, the device and general appearance of the pieces being well preserved, they are placed in rolls among half eagles, and, unless detected, pass for five dollars.

QUARTER EAGLE—\$2.50.

Authorized to be coined by Act of April 2, 1792, and coinage discontinued by Act of September 26, 1890. Weight of genuine Quarter Eagle, 64.5 grains; fineness, 900, and 21.19 carats.

1843.—Weighs 40 grains and is $24\frac{1}{2}$ grains lighter than the genuine.

1843.—Weighs 43 grains and is $21\frac{1}{2}$ grains light.

1844.—Weighs 41 grains and is $23\frac{1}{2}$ grains light.

1846.—Weighs 48 grains and is $16\frac{1}{2}$ grains light.

1849.—Weighs 45 grains and is $19\frac{1}{2}$ grains light.

1851.—Dangerous, only about 3 grains light.

1852.—Weighs 40 grains, being $24\frac{1}{2}$ grains light.

1852.—Most dangerous counterfeit of this denomination discovered. Contains only 27 cents worth gold; weight and size correct. Cannot be detected by acid test.

1853.—A well-made counterfeit, mostly brass, and heavily gold plated.

1854.—Weighs 33 grains, being $31\frac{1}{2}$ grains light.

1855.—Is 5 grains light.

1856.—Is 26 grains light.

1857.—Is 26 grains light.

1857.—Dangerous. Is exact weight of genuine, but trifle thicker and larger in diameter.

1858. } Composed of brass. Reeding and milling good. Trifle too thick. Lettering fair

1860. } on one side, poor on other.

1861.—Weighs 42 grains, and is $22\frac{1}{2}$ grains light.

All above quarter eagles made in mold, composition mostly brass, and heavily plated. Reeding and milling poor, readily detected by light weight.

1862.—Composed of platinum; weighs 64 grains, exceedingly dangerous. Heavily gold plated, detected only by observing edge of coin, when plating is worn, shows platinum underneath.

DOLLARS—LARGE AND SMALL.

Authorized to be coined by Act of March 3, 1849. Weight of genuine Dollar is 25.8 grains, fineness 900, and 21.19 carats.

1851.—This counterfeit weighs 17 grains.

SOUVENIR GOLD DOLLAR.

Authorized by Act of June 28, 1902. Weight, 25.8 grains; fineness, 900. These two gold dollars—one Jefferson head and one McKinley head—sold for \$3 each, and were coined for the Louisiana Purchase Exposition or World's Fair, held at St. Louis, Mo., in 1904. Amount coined in 1902, \$75,080; in 1903, \$175,178. Total coinage, \$250,258.

Authorized by act of April 13, 1904. Weight, 25.8 grains; fineness, 900. These gold dollars sold for \$2 each, and were coined for the Lewis and Clark Exposition, held at Portland, Ore. Amount coined in 1904, \$25,028; in 1905, \$35,041. Total coinage, \$60,069.

Counterfeit Silver Coin

STANDARD DOLLARS.

Authorized to be coined by Act of April 2, 1792. Weight of standard silver dollar, 412½ grains, 900 fine, first coined in 1794. Number of old dollars were counterfeited, composition generally being of German silver and brass, and heavily plated; milling and reeding poor.

Bland or standard silver dollar first coined in 1878; fineness, 900; weight in grains, 412½. All dates of this coin extensively counterfeited; composition generally used being lead, pewter, type metal and iron. Made in a mold, and over 100 grains lighter than genuine; readily detected owing to slippery feeling. A number of very dangerous counterfeits of this coin have been seen recently, which were nearly full weight, averaging from 380 to 410 grains. Composed of antimony and lead, former metal predominating, heavily silver plated. Made in mold; fine general appearance, almost perfect imitation of genuine. The dates of this coin range from 1878 to present time. When coin becomes worn by use, base metal shows beneath plating. Ring trifle imperfect. We warn our patrons against this dangerous counterfeit.

HALF DOLLARS.

Authorized to be coined by Act of April 2, 1792. Weight of genuine half dollar of present issue, 192.9 grains; fineness, 900. Weight prior to 1837 was 208 grains; from 1837 to 1853, 206.25 grains; legal tender for ten dollars. Old issues were extensively counterfeited; composition generally used was German silver and brass, heavily plated; had fair appearance. Of the late issue the country has been flooded with counterfeits of various dates. The most dangerous of these have following dates: 1841, 1842, 1843, 1845, 1849, 1857, 1860, 1861, 1871, 1872, 1875, 1876, 1877, 1892, 1893, 1894, 1895, 1896, 1897, 1898, 1899, 1900. These coins are struck from dies, and made from molds. Metals used are brass, lead, pewter and type metal. Most of these coins are lighter than genuine, and have sharp keen ring, as if containing glass; 1841, 1842, 1872, 1876, 1877 are nearly full weight and size, the last mentioned being a trifle thicker than genuine, and composed largely of brass. Have a very fine appearance, but can be readily detected by milling and reeding, and defective lettering of word "Liberty" on shield of Goddess of Liberty.

In counterfeits of 1894, 1895, 1896, 1897 and 1899, weight, ring and color are equal to genuine, being made of silver. On back shield on breast of eagle imperfect, also words "E Pluribus Unum," letters being irregular, some very indistinct.

The counterfeit of 1898 has the weight, diameter and thickness of genuine coin. Last syllable in "Pluribus" and final "m" in "Unum" on reverse of coin imperfect. Two dies have been used in stamping the reverse side of these coins, which is proven by examining the position of the stars. On some the star touches the last letter "S" in the word "States," while on others it is some distance from it. On the obverse of coin there appears a dot at the top end of the "i" in date "1898," and the nose of figure has flat appearance. Also the figures in "1898" irregular in one die.

QUARTER DOLLARS.

Authorized to be coined by Act of April 2, 1792. Weight of genuine quarter dollar of present issue is 96.45 grains; fineness 900. Prior to 1837 was 104 grains; from 1837 to 1853, 103.125 grains; legal tender for ten dollars. This coin has been very extensively counterfeited of various dates, the most dangerous of which are 1853, 1854, 1855, 1857, 1858, 1860, 1861, 1892, 1893, 1894, 1895, 1896, 1897, 1898, 1899, 1900. Metals generally used, brass, tin, pewter and lead. Made in mold, well plated, calculated to deceive. Reeding and milling usually poor; obverse and reverse not perfect. Counterfeits of this denomination of later date are very inferior, having greasy and slippery feeling, easily detected by any person accustomed to handling money. The counterfeits of 1895 and 1898 have the weight, diameter, thickness and ring of the genuine coin, being made of silver. The most noticeable defect is the words "In God We Trust," on obverse of coin, which on the counterfeit touches the milling of the coin, while on the genuine it does not. On the reverse the "Q" and "R" in "Quarter" are imperfect, and the stars over the eagle are imperfect. The reeding on the outer edge of coin is very well done on these counterfeits.

TWENTY CENTS.

Authorized to be coined by Act of March 3, 1875. Coinage discontinued by Act of May 2, 1878. Weight of genuine twenty-cent piece, 77.16; fineness, 900; legal tender for five dollars. Few counterfeits in circulation; very poor and easily detected.

DIMES.

Authorized to be coined by Act of April 2, 1792. Weight of genuine dime, 38.58 grains; fineness, 900. Weight prior to 1837, 41.7 grains; from 1837 to 1854, 41.25 grains. Legal tender for ten dollars. Counterfeits very numerous. Metals used, brass, pewter and lead. General appearance very poor.

HALF DIMES.

Authorized to be coined by Act of April 2, 1792. Weight of genuine half dime, 19.29 grains; fineness, 900; weight prior to 1837, 20.8 grains; from 1837 to 1853, 20.625 grains; legal tender for five dollars. A few counterfeits of these old dates, exceedingly poor and readily detected.

THREE CENTS.

Authorized to be coined by Act of March 3, 1851. Coinage discontinued by Act of Feb. 12, 1873. Weight of genuine three-cent piece, 11.52 grains; fineness, 900. Legal tender for five dollars. A number of counterfeits of this coin have been seen, fair imitation of genuine, well plated, calculated to deceive.

Silver coins of smaller denominations than \$1, if not mutilated, so as to be unfit for circulation, may be presented in sums of \$20 or any multiple thereof, to the Treasurer, or any Assistant Treasurer of the United States for redemption in lawful money.

Refuse mutilated Silver and Minor Coins, as there is no provision for their redemption.

FIVE CENTS—NICKEL.

Authorized to be coined by Act of May 16, 1866. This coin has been extensively counterfeited, particularly date of 1875; dangerous counterfeit. Struck from a die, and made of same metal as used by mint. Lettering in words "United States" imperfect, also stars surrounding figure "5." Other counterfeits are very poor, composed of lead and pewter, and made in mold.

THREE CENTS—NICKEL.

Numerous counterfeits of this coin circulated. Made in mold, very poor, easily detected.

CENT—COPPER-NICKEL AND BRONZE.

These coins have been counterfeited to small extent, principally to fill cabinets of numismatics, particularly old dates. Good counterfeits of 1884, 1888, 1892, 1896 and 1897 in circulation. Genuine cent is 90 per cent. copper and 10 per cent. zinc and tin, while counterfeit is all copper, hence darker bronze than genuine.

The following is a test for determining whether a coin is good or bad. Use liquids as near edge of suspected coin as possible, as that is part most worn. A drop of preparation will have no effect on genuine coin, while it can be plainly seen on the counterfeit. Heavily plated coins should be scraped slightly before using.

TEST FOR GOLD.

TEST FOR SILVER.

24 grains Nitrate of Silver.
30 drops Nitric Acid.
1 ounce Water.

The above tests should conform with *Diameter*, *Thickness* and *Weight*, tests used at Mint.

CANADIAN CURRENCY

The system of paper money of Canada is similar to that of the United States, consisting of Dominion of Canada notes, which now amount to \$60,000,000, while the note circulation of the different banks amount to about \$75,000,000, the whole volume being subject to contraction or expansion, as circumstances may warrant.

PROVINCE OF CANADA—Bills: \$1, \$2, \$5, \$10, \$20, \$50, \$100, \$500, \$1,000—recalled from circulation.

DOMINION OF CANADA—Scrip, 25 cents. Bills: \$1, \$2, \$4, \$50, \$100, \$500, \$1,000, \$5,000.

DOMINION OF CANADA—\$5.00, \$10.00, \$20.00—retiring.

Some issues of "Dominion of Canada" Bills are printed on the back "Payable at Toronto, Montreal, St. John, Halifax, Winnipeg, Charlottetown, or Victoria," but later issues have engraved, through the center of the green or brown printed design on the back, the words "DOMINION OF CANADA," and are redeemed by any of the Assistant Receivers-General throughout the Dominion.

Newfoundland is not in the Dominion of Canada, but all other Bills of Banks in the Dominion are now received at par in all portions of the Dominion, but subject to a discount by Brokers in the United States, the highest rates prevailing in the winter months and at points most distant from place of issue or redemption.

THE NATIONAL COUNTERFEIT DETECTOR, on the following page, gives a list of Parent Banks in business in the Dominion of Canada for the protection of all its subscribers from doubtful, broken and worthless institutions, which previously existed in the Provinces, their bills being still in circulation and used by dishonest persons. These parent banks have branches in other sections of Canada, and bills of smaller denominations than fives were formerly issued.

- Charlotte County Bank, St. Andrews, N. B.
- City Bank Montreal, Montreal, P. Q., merged into the Consolidated Bank of Canada, Montreal, P. Q.
- Colonial Bank of Canada, Toronto, Ont.
- Commercial Bank of New Brunswick, St. John, N. B.
- Commercial Bank of Newfoundland, St. Johns, Newfoundland.
- Consolidated Bank of Canada, Montreal, P. Q. Bills were redeemed at par in Montreal, until during year 1890, but all tens were worthless, having been stolen unsigned, and signatures forged. Since then all bills are worthless.
- Exchange Bank of Canada, Montreal, P. Q. Suspended Sept. 17, 1883. Bills were redeemed at par, but any now outstanding are worthless.
- Farmer's Bank of Rustico, Rustico, P. E. I. Went into voluntary liquidation in 1895-6, and bills redeemed up to year 1900.
- Farmer's Joint Stock Banking Co., Toronto, Ont.
- Federal Bank of Canada, Toronto, Ont. The bills were redeemed at par for about five years, but bank was wound up and bills became worthless in 1893. Some \$10,000 were supposed to be thus left outstanding.
- International Bank of Canada, Toronto, Ont.
- La Banque Ville Marie, Montreal, P. Q.
- Maritime Bank of the Dominion of Canada, St. John, N. B. Bills were redeemed at par, but bank wound up and bills became worthless in 1893.
- Mechanics' Bank, Montreal, P. Q.
- Metropolitan Bank, Montreal, P. Q., went into liquidation about 1876 and redeemed all of its outstanding notes that were presented before the final closing up of the bank's business. In no way connected with the Metropolitan Bank, Toronto, Ont., organized in 1902.
- Pictou Bank, Pictou, N. S. Bank closed, bills worthless.
- Provincial Bank of Canada, Stanstead, P. Q., early established under the Free Bank Act, withdrew from business January, 1864, its notes being redeemed and the securities returned by Government.
- Royal Canadian Bank, Montreal, P. Q., merged into the Consolidated Bank of Canada, Montreal, P. Q.
- Stadacona Bank, Quebec, P. Q. Bills of this bank were redeemed at par until August 1, 1890. Since then bills outstanding are worthless.
- Union Bank of Montreal, Montreal, Que. Bank unknown, but bills worthless.
- Union Bank of Newfoundland, St. Johns, Newfoundland.
- Westmoreland Bank of New Brunswick, Moncton, N. B.
- Zimmerman's Bank, Elgin, Ontario, established in 1854 under the Free Bank Act, became the Chartered Bank of Clifton by Act of Parliament in 1858. The notes of the Zimmerman Bank were redeemed and securities returned by Government.

Counterfeit Canadian Bills

ONES

DOMINION OF CANADA.

1. Portrait of Jacques Cartier, old issue, dated Ottawa, July 1, 1870. Check Letter D. Red numbers. "Payable at Toronto" on back. Upper left end of note not good; white streak extends from ear to chin on side of face which is not found in genuine. Lathe work around 1, right of note, irregular; lines cannot be traced. There are three issues of these counterfeit bills, the difference being principally in the size of the red figures.
1. Portrait of Lady Dufferin. Letter A. "Payable at Montreal." Dated 1st June, 1878. Very poor counterfeit on very soft paper and some numbers in green. Another issue of the counterfeit is on stiff white paper. Portrait and all lathe work very coarse work.
1. Lady Dufferin portrait. Letter A or C. "Payable at Montreal." Date, 1st June, 1878. Another large lot of similar counterfeits to the last above appeared in May, 1899. Paper like the softest kid. Genuine portrait has her right shoulder shaded or dark, but left shoulder is very light. Counterfeit has both shoulders equally shaded and very dark. Letters C and A are confusing. The A (black ink) is just under, and the C (black ink also) is just ahead of, the blue number.
1. Portraits—Aberdeen and wife. Series A. Letters A, B. Dated Ottawa, March 31, 1898. Engraving poor. Lathe work, shading lines about Ottawa and date, and other fine work, very bad. "For Minister of Finance" omitted.
1. Aberdeen issue. Series B. Letter C. Dated Ottawa, March 31, 1898. Light brown ink design about bottom face of note. Photo-mechanical on good paper, and all colors good. Quality of engraved work poor; it is dark, coarse and blotchy, especially in log-rolling scene and in lathe work around large counters "1." Word "Series" hardly legible. Some fine shading lines are solid black. Back better work than face, green ink too light.

BANK OF BRITISH NORTH AMERICA, St. John, N. B.

1. Lithograph, old. "New Brunswick" across end of bill.

BANK OF MONTREAL, Montreal, P. Q.

1. Old. Right upper corner, 1 on ships under full sail. Left upper corner, two Indians and shield.

BANK OF TORONTO, Toronto, Ont.

1. Vignette: Lumberman, axe and log.

UNION BANK OF PRINCE EDWARD ISLAND, Charlottetown, P. E. I.

1. Dated 1st January, 1872. Photograph poorly done. No. 30252. Green letters in ONE and red letters in "Canada Currency" badly printed or painted.
None of the above banks now issue \$1 bills.

TWOS

DOMINION OF CANADA.

2. Portrait of Lord Dufferin. Check letter B. Blue numbers. "Payable at Montreal." Dated June 1st, 1878. Very dangerous. Both face and back of note good. Portrait of Lady Dufferin good, though forehead appears a little too broad or full. Paper fair, but a little harsh and yellowish. Color of blue numbers excellent. On face of bill lathe work in large green figures 2 is poor, and in lower half of each of these figures 2 there are on genuine bill four upright zigzag lines, formed by the peculiar shape or joining of fine lathe work lines, but on counterfeit notes these four engraved zigzag lines are very prominent, and the two centre ones do not touch one another as on genuine. In imprint, "British American Bank Note Co., Montreal," dots over "i's" omitted. Final e in word "Finance" in small print "For Minister of Finance" is larger than other letters.
2. Dufferin issue. Letter C. Red numbers. Payable at Toronto. Dated June 1st, 1878, which date in some cases has been changed. *Some defects in zigzag lines as mentioned in above paragraph.* Dangerous, excepting poor centre vignette of Lord Dufferin, and imitation lathe work in large green 2's. Most all the other work is about as good as some genuine. When vignette of Lord Dufferin is worn this note is very dangerous. Paper fair, but in some cases very good. Color of red numbers on some of these notes is very bad and on others quite fair.
2. Lansdowne issue. Letter B. Dated Ottawa, July 2d, 1887. Has a blurred and indistinct appearance, and green design in centre is off color. Figures used in numbers are only half the size of genuine and printed in purple ink. Under title "Dominion of Canada" the words "Will pay" are very poorly engraved. To the left and under word "Ottawa" (in date line) printed word "Countersigned" over signature is omitted in counterfeit. Words "For Minister of Finance," under signature of J. M. Courtney, are also omitted.
2. Portrait of King Edward. Letter A. Dated Ottawa, July 2d, 1897. Portrait, center vignette and lathe work very poor. Red number too light; lettering fair. Back of note poor. Paper fair.
2. Portrait of King Edward. Letter C. Dated Ottawa, July 2d, 1897. Appears photo-engraved, but poorly done, especially colors. Lathe work is all poor, especially around border and large counter "2" on right end face of note. Shading lines of "Dominion of Canada" are very heavy and poor, also parallel ruling in sky. Paper fair and portrait fair. On back of note words "American Bank Note Company, Ottawa," poorly printed.
2. Portrait of King Edward. Letter D. Dated Ottawa, July 2d, 1897. Poor. Portrait a poor likeness and of very coarse work, especially shading lines on face and forehead and in background. All fine shading lines on note coarse, and lathe work poor. Note has not as good work on it as on a previous issue of letter C, but has better colored black and chocolate inks. Paper thick.

BANK OF MONTREAL, Montreal, Quebec.

2. Vignette: View of Niagara Falls, railcars and bridge.
2. Ottawa Branch. Dated March 1, 1852. Coarse engraving. "Ottawa" in red.

BANK OF TORONTO, Toronto, Ont.

2. Vignette: Shield, Lion and Unicorn.

TWOS—Continued

QUEBEC BANK, Quebec, P. Q.

2. Toronto, Ont., Branch. Old issue, dated 1860.

UNION BANK OF PRINCE EDWARD ISLAND, Charlottetown, P. E. I.

2. Plate A, dated 1st Jan'y, 1872, and numbered differently in blue or green ink. Photo. Large letters in TWO, green or blue inks badly printed or painted; also red letters in "Canada Currency."
2. Letter A. Dated March 1st, 1875. Coarse engraving, similar to an inferior woodcut. Fully one-quarter inch shorter than genuine. "British-American Bank Note Co., Montreal," omitted. Line "Dominion of Canada," over vignette-engraving of dog and safe, is without any shading.

None of the above banks now issue \$2 bills.

FOURS

BANK OF BRITISH NORTH AMERICA.

4. St. John Branch, N. B. Old issue. Photograph, and very pale.

CITY BANK MONTREAL, Montreal, P. Q.

4. Poor counterfeit. Paper poor; inks and lathe work very defective. Bank not in existence.

DOMINION BANK, Toronto, Ont.

4. Old issue. Dated Feb. 1st, 1871. Letter B. There is a white line around the hair portion of Prince Arthur's head, which serves to separate it from background. Cashier's signature, W. H. Holland, Jr., is engraved, while on genuine it is written. Lathe work very irregular.

BANK OF UPPER CANADA, Toronto, Ont.

4. Alterations from notes of failed Bank of Western Canada, Clifton. Words "Western" and "Clifton" are erased, and words "Upper" and "Toronto" substituted. This is done by means of acid, also by pasting.

THE BANK OF TORONTO, Toronto, Ont.

4. Alterations from notes of the failed Colonial Bank of Toronto. Words "Colonial Bank of Canada" are erased and words "Bank of Toronto" substituted.

These are one-dollar notes raised to four by pen and ink additions and changes; are also recolored.

FIVES

BANK OF BRITISH NORTH AMERICA, Montreal, P. Q.

5. Quebec Branch. Very old issue. Dated 22nd Nov., 1871. Check Letter A. Photograph very pale. Very badly printed, especially the green ink.
5. Kingston Branch. Old issue. Dated May 1, 1875. In border of genuine the lines of shading on scrollwork are fine and clear; on counterfeit the shading is omitted. Genuine notes of this issue are numbered from 30001 to 36000 inclusive; counterfeits bear other numbers than those on genuine of this date. Lathe work fair. Very few genuine notes of this date and issue in circulation.
5. Old issue. Letter D. Genuine are dated 3d July, 1877. On counterfeit the date of month is omitted. Imprint of British-American Bank Note Company, Montreal, upper left, border of note, poorly engraved; vignettes badly done. On lower left end Britannia seated has her right hand resting upon shield, the lower rim of which is well defined by a clear *white* line which does not appear on genuine bill. Another counterfeit of this note has appeared, dated 5th July, 1877.

BANK OF MONTREAL, Montreal, Quebec.

5. Old issue. Dated 1858, Sept. 1, and bears in centre TWENTY-FIVE SHILLINGS CY in a large panel; FIVE DOLLARS in lower left of note in a small panel. Date of issue and numbers printed in blue. In upper right and upper left are two small vignettes. Quebec (spelled Quebec) appears on this counterfeit in three places in blue ink. *There is also a counterfeit on the Ottawa branch, the only difference being the date of issue, and numbers, also Ottawa, are printed in red.* Refuse all bills of this kind.
5. Old counterfeit. Vignette in upper right corner, steamer; left end, cattle.
5. Dated Jan. 2, 1895. Series C and D. Fair wood-cut, but quality of work will not bear close inspection. Lettering and numbering poor. Series C countersigned by N. McLean, D by J. A. Paddon.
5. Fair. Dated January 2, 1895. Portraits of Rt. Hon. Lord Strathcona and Mount Royal, also E. C. Clouston, General Manager, not as lifelike as genuine and poorly engraved. The "V" in centre, also panel lower face of note containing signatures, is a light brown; on genuine they are pale green. Back of note poor. Paper fair quality.
5. Fair. Dated Jan. 2, 1904. Series A. Portraits of Sir Edward Clouston and Sir Edward Drummond are coarse and appear to be sketches of original. Whole bill probably sketch from which a plate was made. Paper thick. General appearance of bill attracts attention. On careful examination, fine lines over heads and faces of portraits appear different, being few and continuous. Lines on coats coarse and roughly cross-lined. Lathe work coarse. Red numbers fair.

BANK OF NOVA SCOTIA, Halifax, N. S.

5. Dated Halifax, July 5, 1877. Letter B. Very rough pen and brush work.

BANK OF TORONTO, Toronto, Ont.

5. Port Hope (Branch) issue. Photo. Letter E. Dated July 1st, 1880. Color is a purple-brown. Green FIVE across lower centre face of bill is painted over with a green water-color. Numbers are painted in red water-color, and letters in PORT HOPE painted in blue ink.
5. Petersborough (Branch). Photo. Only a few of these notes were made; numbers on all 29356. Easily detected on account of their brownish tint.

CANADIAN BANK OF COMMERCE, Toronto, Ont.

5. Old issue. Letter C. Dated May 1st, 1871. Signature of E. J. Smith. Cashier, is heavily printed; on genuine it is written. In oval portrait in centre the Queen's face is turned more to the front than in genuine. Engraving of portrait coarse.

FIVES—Continued**DOMINION BANK, Toronto, Ont.**

- 5. Dated 2d Jan., 1900. Letter B. Poor, especially face. Lathe work badly broken. Paper fair.
- 5. Dated Toronto, 2d January, 1900. Poor woodcut production, very crude.
- 5. Dated 2d Jan., 1900. Letter C. Photographic. Poor counterfeit.

FARMERS BANK OF CANADA, Toronto, Ont.

- 5. Check letter C; dated Jan. 2d, 1907; signed W. Seeltie Nesbitt, President, and countersigned T. H. Weir, pro Gen'l Manager. Poor woodcut. Lathe work, front and back, very poor, cannot be traced; numbering very poor; vignette of farm scene on front coarse and scratchy. Imprint of British-American Bank Note Co., Ottawa, bottom of note, hardly legible. Green background on face too light and very poorly printed. Back poorly executed and too dark a green.

LA BANQUE DU PEUPLE, Montreal.

- 5. Pen and ink. Letter A. Portraits very poor. Lathe work surrounding the 5 very poor.

MARITIME BANK OF ST. JOHN, N. B.

- 5. Photo. Letter B. Poor counterfeit. Photographic pen and ink process.

MOLSONS BANK, Montreal, Que.

- 5. Dated Montreal, 2d July, 1901. Check letter A. Poor woodcut. Numbering, lathe work and vignettes poor. Large green 5 and green V on each side of large 5, center of note, coarse and too dark. Signed Wm. Macpherson, President, and countersigned H. R. Jeffrey, pro Gen. Mgr.
- 5. Dated Montreal, July 2, 1901. Check letter B. Signed Wm. M. Macpherson, President, and Elliott, pro Gen. Mgr; also Jeffray, pro Gen. Mgr. Other counterfeits will likely appear, bearing other signatures for pro General Manager. A second issue, bearing Check Letter C, has also appeared.

QUEBEC BANK, Quebec, P. Q.

- 5. Dated 2d July, 1901. Letter H. Blue numbers. Poor. Work on face especially poor.

TRADERS BANK OF CANADA, Toronto, Ont.

- 5. Date July 2d, 1897. Letter D. Like a photographic production, dull gray in color. Numbers should be in blue; those seen are traced over in red ink.
- 5. Dated Toronto, 2d July, 1897. Check Letter D. Signed C. D. Warren, President, and W. G. Bryans, pro Gen. Mgr. Poor photo-mechanical. Vignette portraits of President and Gen. Manager coarse work, but fair likenesses. Vignette of farm-yard scene in centre scratchy and blurred. Lathe work in counters very poor, also blue numbers. Large green V near each end of note too dark a green, and fine work in body of V cannot be traced. Back poor; lathe work all blurred and color of green too dark. Imprint of British-American Bank Note Co., Montreal, bottom on back, can hardly be deciphered.

UNION BANK OF PRINCE EDWARD ISLAND, Charlottetown, P. E. I.

- 5. Photograph, poorly done. Plate A. Easily detected by faded appearance.

TENS**BANK OF BRITISH NORTH AMERICA, Montreal, P. Q.**

- 10. Ottawa Branch, Ottawa, Ont. Photograph, and very poor.

BANK OF MONTREAL, Montreal, P. Q.

- 10. Dated January 2, 1882. Letter D. Very poor. Face and back same design.

BANK OF TORONTO, Toronto, Ont.

- 10. Dated Toronto, 1st June, 1892. Letter D. General appearance, yellow face and red numbers, all colors and paper good. On close inspection Coat of Arms in center of crude finish, lathe work in counters flat and broken. Large letter of "Bank of Toronto" have no line work about them—only solid work. In lower center margin "American Bank Note Co., Ottawa," omitted. Back of note has no linework. Bill a very fine pen or pencil and brush work job, black ink and all colors can be removed by damp sponge.

CANADIAN BANK OF COMMERCE, Toronto, Ont.

- 10. Dated May 1st, 1871. Letter D. Very dangerous. Signed Wm. McMaster, President, and W. Cooke, Cashier. Color of blue numbers a trifle lighter than genuine. Vignette in centre coarser than genuine, particularly head of lion. In counterfeit the bases of letter A in "Dollars" are connected in one line, while in genuine there is a distinct opening. The staff or perpendicular line of letter P in "President" in counterfeit extends below line upon which "President" is written; in genuine it terminates directly on the line. There are five shaded lines under "Ten Dollars" in counterfeit, and only four in genuine. Shading of the title, Bank of Commerce, coarse and scratchy; lathe work excellent, but slightly defective. Back of note, color of green ink lighter than genuine, and lathe work defective. Paper is thinner than genuine.

CITY BANK MONTREAL, Montreal, P. Q.

- 10. Poor. On counterfeit the word "Parliament" is printed "Parliment."

DOMINION BANK, Toronto, Ont.

- 10. Check Letters A and B. Photo. Easily detected by poor coloring and omission of fine lettering at bottom over which signatures are written. Watermark, "Dominion Bank," is very faint, and green is almost a blue. Attempt to imitate color tints on back of note is very crude.

FARMERS BANK OF CANADA, Toronto, Ont.

- 10. Dated Jan. 2, 1907. Check letter A. Lathe work, vignette and numbering very poorly done. W. Seeltie Nesbitt, President; countersigned T. H. Weir, pro Genl. Manager.

IMPERIAL BANK, Toronto, Ont.

- 10. Dated Toronto, Ont., March 1, 1875. Letter B. Poor counterfeit. Portraits and lathe work in counters very poor. Back of note fair, but lathe work poor. Paper smooth and stiff.

LA BANQUE NATIONALE, Quebec, P. Q.

- 10. Dated April 28, 1860. Check letter A. Vignettes all coarsely done, as are the large 10's and the counters in both upper corners. Lettering is much better and deceptive. "P" in "President" directly over "D" in "DIX" on genuine, bottom border. Counterfeit, "P" is over the "IX."

MARITIME BANK, St. John, N. B.

- 10. Dated Oct. 5, 1881. Check letter A. Photographic pen and ink counterfeit. General appearance of this note is extremely poor and readily detected. Bank failed. Notes worthless.

TENS—Continued

MERCHANTS' BANK OF CANADA, Montreal, P. Q.

10. Photo. Letter D. Green tint on face and back is rubbed on over purple photographic tints with an oil green crayon pencil, which gives the green a yellowish blue and the work a blurred appearance. Very few notes printed.

MERCHANTS' BANK OF HALIFAX, Halifax, N. S.

10. Dated 1st Jan., 1874. Photograph and lithograph combined. Purplish tint in the photographic part, the 10—TEN—10 being done in red and green ink by lithography, and badly blurred. Vignette of ship under sail is very coarse, while in genuine it is very distinct.
10. Old issue. Dated 1st Jan., 1874. Engraved and lithographed, having blurred and dark look. "Cash'r," "Pres't" and name of printers, "Blades, East & Blandes, London," are all omitted.

MOLSONS BANK, Montreal, Que.

10. Date, Jan. 2, 1900. Letter B. Very poor photo. Has blurred appearance and is on heavy paper.

ONTARIO BANK, Toronto, Ont.

10. Letter A. Dated Bowmanville, Nov. 1st, 1870. Foliage in engraving of woodsman chopping down tree is indistinctly worked up, being rather blurred in its details. There are two issues of these counterfeits on some of which the imprint of the "British-American Bank Note Company, Montreal and Ottawa," does not appear.
10. Check letter A. A very poor photograph. No description necessary.

PEOPLE'S BANK OF NEW BRUNSWICK, Fredericton, N. B.

10. Photograph, poorly done. Plate A. Detected by its faded appearance.

QUEBEC BANK, Quebec, P. Q.

10. Dated Jan. 3, 1898. Letter C. Signed John Breakey, Pres.; countersigned V. F. Convey. Photo. Centre face of note, vignette "City of Quebec" badly blurred, but by careful printing might be improved. Figures in number of note in red are slightly thicker and longer than those on the genuine. Back nearly black instead of blue. Lathe work and paper fair.

STANDARD BANK OF CANADA, Toronto, Ont.

10. Dated Toronto 1st May, 1900. Check letter A. Very poor woodcut. Poor quality of paper. Numbering brick red and very poor. Lathe work in counters poorly done. Vignette portrait on right end exceedingly poor. Lettering of Canada Bank Note Printing Co., lower centre of note, broken and indistinct, also imprint of British-American Bank Note Co., Montreal, in lower border. Back has no semblance of lathe work.
- 10 raised from 1. Government issue. Vignette—Lady Dufferin. Note scraped with a knife and alterations of figures and large characters are done with pen and ink. Border and other parts of note made indistinct by ink lines scattered over. No genuine \$10 Dominion notes.
- 10 raised from 5. Many raised bills have been found in circulation. The altered parts are done by the "bugging" process, which shows very plainly upon holding the bill up to the light.

TWENTIES

EASTERN TOWNSHIPS BANK, Sherbrooke, P. Q.

20. Dated Jan. 2, 1903. Very dull, faded color; but few issued.

SILVER COUNTERFEITS

The 20, 25 and 50 cent Canada silver pieces have been extensively counterfeited.

ENGLISH BANK NOTES AND COINS

- £5 English Bank Notes, dated London, 1862, and Sept. 13, 1901.
- £5 Bank of England Note, dated January 4, 1898. Photographic pen and ink.
- £10 Bank of England Notes, dated Sept. 21, 1901.
- £20 Bank of England Notes, dated Birmingham, May 20, 1890, marked with blue stamp, "London and County Banking Co., Limited, Stratford."
- £20 Bank of England Note, dated May 20, 1893. Pen and ink production.
- £20 Bank of England Note, dated Jan. 15, 1896. The notes present a gray, dirty and greasy appearance, which has evidently been caused by inserting the water mark by an oily process. The cipher number of these bills is M—8, the consecutive numbers differing.
- £50 English Bank Notes, dated London, May 16, 1883, marked with blue stamp, "London and County Banking Co., Limited, Brompton, 26—0."
- £50 Bank of England Note, dated London, May 16, 1883, stamped in red letters across lower part of note, "Channel Island Bank, Limited, Jersey."
- £50 Bank of England Notes, dated March 6, 1901.
- £100 English Bank Notes, dated London, August 16, 1883.
- £500 English Bank Notes, dated London, August 16, 1883.
- £5 and £10 Provincial Bank of Ireland, each dated November 10, 1880.

The paper of these counterfeits is thicker and darker than that of the genuine.

ENGLISH SOVEREIGN.—A dangerous counterfeit; weight of genuine coin, 123.27 grains; fineness, 916 2-3. Weight and thickness same as genuine. Composed of platinum, heavily gold-plated. As coins become worn, platinum can be observed distinctly. General appearance good, and liable to deceive. The dates are 1862, 1863 and 1872.

ENGLISH HALF-SOVEREIGN, composed of same metal as sovereign above reported, is in circulation.

Stolen Bank of England and Canadian Notes

The following notes of the Bank of England are reported to have been stolen:

Fac-simile of Discount Glass

Fac-Simile of Discount Glass Used at the National Bank Redemption Agency for Discounting National Bank Notes, and by the U. S. Treasurer for Discounting U. S. Notes, Gold and Silver Certificates.

U. S. Treasury Notes, also Gold and Silver Certificates, are about $\frac{1}{4}$ inch longer than National Bank Notes. A calculation, however, can be made from this Scale.

All Notes equalling or exceeding three-fifths of their original proportions, and bearing the name of the bank and the signature of one of its officers, are redeemable at their face value. Mutilated, U. S. Notes, Gold Certificates and Silver Certificates are redeemable at their face value by the U. S. Treasurer and Assistant Treasurers, when not more than two-fifths of the note is missing. When mutilated so that less than three-fifths, but clearly more than two-fifths, of the original proportions remain, are redeemable by the Treasurer only, at one-half the face value of the whole note or certificate; unless when accompanied by an affidavit that the missing portions are totally destroyed, and then all fragments are redeemable at full face value.
